4-Feb	We are very pleased with the thoughtful consideration of demographic data, community input, and utilization of facilities that the proposed plan encompasses. We can not think of any further improvement or changes to add, and endorse the plan as proposed, we are further satisfied that the district has gone above and beyond to satisfy the needs of all as evidenced by the "Grandfathering" clause, and feel confident that this plan can be objectively embraced by everyone. 4-Feb	I think this has been considered, but I believe it needs to be revisited: Do you really consider 3400-3600+ a "manageable" amout for SLHS?		I think you should visit the school now.
