

GROWTH

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Kilpatrick	1. Lunch Delivery needs to be addressed. My Kindergartener eats at 10:30 and my 5th grader 1:30. That is way too early and way too late for lunch.	Use less space for gym and more for cafeteria
Morton Ranch Junior High		evaluate master schedules focusing on number of students per class/teacher
Williams, Beck, Seven Lakes, CRHS	n/a	My subdivision, Bayou Crossing is the only neighborhood that feeds into Williams that does NOT then feed from the JH (Beck) into CRHS. This needs to be changed for keeping friends together who have developed networks for supporting one another in assignments, for the area superintendent program because the area superintendent for Beck is not the same as Seven Lakes, where Bayou Crossing is currently zoned so no continuity of administration, because CRHS is actually closer to Bayou Crossing and given the growth, the travel to time to Seven Lakes is far and is going to get worse, and to make feeder patterns consistent.
Taylor High School		Re-district and utilize current campuses to capacity.
Taylor High School	I am interested in seeing an increased enrollment at Taylor High School. Taylor is in jeopardy of losing programs due to a decrease in the student population. Taylor has been an academic leader in this district and deserves to be able to continue this long history of excellent educational representation for our district.	Please consider rezoning LUZ 66 and surrounding areas back to Taylor. Maybe even consider rezoning all of McMeans Jr High to Taylor
Taylor High School		I think the school zone lines need to be drawn. The kids that live in Lakes of Buckingham and Kelliwood Gardens have to drive through neighborhoods that go to Taylor High School to get to Cinco Ranch HS. Doesn't make sense. It's a waste of gasoline and time. These same students went to elementary school and jr. high school with the students at Taylor.
Taylor High School	Move kids around instead of building more schools to fully utilize your EXISTING buildings	Level out enrollment amongst the district high schools - move kids from crowded schools to those under utilized. The same needs to be done for junior highs and elementary schools.

GROWTH

James E Taylor High School		Taylor High School is being underutilized. With only 2,500+ students, there is more capacity at the school for additional students. In contrast, Seven Lakes, currently has 4,000 students. Before purchasing temporary buildings or asking for new bonds to fund new schools, KISD needs to relevel by rezoning to ensure that all schools in the district are utilized appropriately. All schools in the district should have equity in the programs offered and this can only be done by making sure that the current facilities are correctly utilized and staffed accordingly. Thank you.
Taylor HS		move populations that are zoned for Cinco Ranch to THS, then move populations zoned to Seven Lakes to Cinco ranch to distribute increased westward populations Don't build new High Schools, maximize the existing facilities
Taylor High School	I believe that if the students from MMJH had a pure feeder pattern to Taylor, Student enrollment would increase, community support for a great school would improve, and students from MMJH would have a better sense of belonging and school spirit! Tha kids at MMJH are torn on their loyalty because the students attend different high schools!The distance to Cinco Ranch High school is too far for LUZ66. You have to travel through 3 school zones and under a major high way which becomes very concerning when your child begins to drive!	Rezoning LUZ66 back to Taylor high school along with any other LUZ that attend MMJH. Pure feeder patterns are important for Jr High students.
Taylor HS		Rezone homes that feed into McMeans back to Taylor to keep Taylor's numbers up, so that we do not lose funding. Thank you, Shea

GROWTH

Taylor High School	I believe that Taylor is in danger of losing some of its excellent programs due to decreasing enrollment. Rezoning Taylor, Cinco and Seven Lakes is an excellent way to solve the overcrowding problems and to save Taylor's programs as opposed to building new facilities.	I believe that rezoning the existing Katy ISD schools to balance out the enrollment better addresses the growth issue rather than building new schools. Since Taylor's growth has been declining, I believe that a responsible remedy would be to increase Taylor's enrollment by rezoning Taylor High School and Cinco Ranch so that students residing in Land Use Zone 66 or some other part of the Cinco Ranch boundaries could be moved back to Taylor High School from Cinco Ranch. Perhaps then there would be room to move some of the Seven Lakes students to Cinco Ranch and so on. I would hate for Katy ISD to overbuild new schools and then have to close some of its schools in the future. It makes better economic sense to rezone the existing schools in order to balance out the enrollment. I grew up in Spring Branch ISD and graduated from Westchester High School in 1980. Thirty to 40 years ago, Spring Branch ISD, another excellent school district at the time, exploded in growth as Katy ISD is doing today. Therefore, they continued to build new schools. In the late 1980's, they had to close Westchester High School as the demographics changed in the neighborhoods. Spring Branch High School and Westchester Jr. High were also closed. I would hate for Spring Branch
Taylor High School		Our student population at Taylor High School is decreasing while other KISD high schools are bursting at the seams. As a result, Taylor will see cutbacks in the classes offered as well as programs. This does not make sense. I think it would be wiser to revisit the school boundaries and balance student population before adding new facilities.
Taylor High school		I understand that Seven Lakes is near capacity, and i wondered why students could not be moved around between CRHS, SLHS and THS. it seems that buses are criss crossing each other i.e. there might be a transportation benefit also. I think McMeans should all attend THS and some students from SLHS should attend CRHS, etc.
James E Taylor High School	Our distrct does a great job of updating our older facilities - I would just like to see that remain a priority.	Stop building and look at changing our attendance zones

GROWTH

Taylor High School	Taylor is losing students to overpopulated new schools. We need to increase our enrollment in order to avoid loss of funds for programs such as AP and FFA programs.	Have the students attending McMeans Jr. High go to Taylor and not be split between Taylor and Cinco Ranch. Then have rezoning for Seven Lakes and Cinco Ranch. That way it would even out between facilities without building new.
Taylor high school	<p>Improvements desperately need to be made in the pool. This area of the school is outdated. Studies show that students active in sports and the art do better. I know that KISD is well aware of this and generally does a good job of supporting these groups.</p> <p>We also need to look at reallocating student enrollment. One school should not be overflowing while another is underutilized. If you move to a rapidly growing area you should be aware that school changes may occur. One way to do this would be to shift all the students that go to MMJH so that they all attend THS. That could allow for changes at Cinco and Seven lakes.</p>	Reallocating students to less attended campuses. If bus number become an issue have a staggered start time at the high schools and jr high. this would mean that some students would start at first period and some would start at second and stay one period longer. It could be geographically based starting with the students farthest from the school. After they are dropped off the busses have less distance to travel for the second round of pickups.
Schmalz Elementary	<ol style="list-style-type: none"> 1. Fewer students enrolled so there wouldn't be the need for so many portable buildings. There isn't much of a playground left as it is. 2. Dedicated computer labs WITH computer instructors. If students are going to be ready for the technology of the future, computer teachers are just as essential as art and music teachers, if not more so. 	Rezoning. If you take a good look at the neighborhoods that feed into BCE, WE, MCE, and SES, it really doesn't make good sense. Also, recreating WE as a "special" campus with only 500 students attending does nothing to alleviate growth (in fact, it will add to the congestion at other schools when the students from the Clay Rd. area are sent elsewhere) and is a waste of money unless you are going to provide a larger campus.
Taylor High School	Reverse Land Use Zone 66 back to Taylor High School. Rather than overcrowding at other schools, rezone KISD. Taylor's enrollment is dropping due to the kids aging out. With decreased enrollment, THS will lose important programs and funding.	Rezone KISD. Reverse Land Use Zone 66 back to THS.
Taylor High School	Rezoning to distribute a more equal population in the area high schools to assure continued programs at Taylor and prevent temporary buildings for excess populations in other schools.	

GROWTH

Taylor High School		It appears that the schools in the older neighborhoods, such as Nottingham, Kelliwood and Thornwood, are under utilized. Why are we building all these new schools which are immediately overcrowded, when some of the students can be rezoned to schools such as Taylor, NCE and Wolfe, and relieve some of the overcrowding at the schools in the western and northern portions of the District.
Taylor High School	<ol style="list-style-type: none"> 1. We need an increased enrollment to protect programs at THS. 2. The district needs to utilize existing facilities before building/buying new ones. 	<p>Use the existing facilities instead of using tax payer money to purchase temporary buildings or to ask the tax payers to pass a bond issue to build new facilities even before the existing schools are leveled out.</p> <p>2. Zone every junior high to the same high school. Do not split junior highs. It is very emotional and heart wrenching for our children's friends to go to a different high school than our children.</p>
Taylor High School		<p>I am admittedly uneducated about how our school compares to others, but have overall been happy by my kids educational experience at Pattison, McMeans & Taylor. I'm a realtor and have attended several sessions held by district planners and have always been impressed with the foresight of our district with regard to new schools. My biggest concern is the potential decline of our older school, Taylor High School. It sounds like our numbers may be dropping and hence financial support/programs offered my suffer?? All I ask is that you draw the lines in a manner that MAKES SENSE and doesn't benefit the folks who complain the loudest and just want to stay at the newer schools! Maintaining a high standard at all of our schools obviously benefits the entire district. Thanks for all you do!</p>

GROWTH

James E. Taylor	<p>1. Redraw the enrollment boundary lines to increase the enrollment at Taylor (and level off the district wide enrollment) to ensure the integrity of the continuation of excellence in education and extracurricular activities for these "blue" children.</p> <p>2. Increase the enrollment numbers at Taylor to ensure that educational and extracurricular programs will not be cancelled at Taylor and to increase competition in these areas which is always a stimulus for excellence.</p> <p>3. Updating and maintaining the physical safety and educational/technological environment at Taylor to ensure that the teaching atmosphere for the children and teachers are on track with the rest of the district schools. This is a minimal requirement for our district wide facilities before we talk about building new facilities.</p>	<p>The district should use each facility currently in existence to the fullest of its ability. The district should level off enrollment by redrawing boundary lines. These new lines must make geographical sense so that children go to the schools that are physically close to their place of residence. Perhaps, Land Use 66 should be RETURNED back to Taylor as a start. Redrawing of lines is a minimal position the district should take.</p>
taylor high school	I HAVE HEARD THAT PROGRAMS MAY BE CUT FROM TAYLOR DUE TO UNDER ENROLLMENT.	REDRAW SOME OF THE BOUNDARIES THAT SEND KIDS THAT RIGHT LIVE RIGHT DOWN THE STREET FROM TAYLOR TO CINCO WAY ACROSS TOWN.
James E. Taylor HS and Seven Lakes HS		<p>As a parent of a KISD student zoned to Taylor HS, I am concerned to hear that some of Taylor's programs may be cut to fund the overcrowding problem at Seven Lakes HS. Since Taylor's enrollment has decreased, I recommend shifting the district's attendance zones and redistributing the students. This will give the district some time to make a decision on whether or not to build HS number 7 and in this tough economic environment, it makes good sense.</p>
Taylor High School		<p>Rezone! In these uncertain economic times, why would you build new schools?</p>

GROWTH

Taylor High School		Taylor's enrollment this year is approximately 2530 students, which is down from year's past. In contrast, Seven Lakes HS is projected to have close to 4000 students next year. Taylor needs a larger enrollment to avoid loss of funds for programs. One way to solve this growth issue is to use the existing facilities instead of using tax payer money to purchase temporary buildings or to ask the tax payers to pass a bond issue to build new facilities. KISD needs to fully utilize existing facilities before building new ones.
Seven Lakes High School	No new building necessary	Rezone Cinco Ranch zone to include Bayou Crossing Subdivision
Seven Lakes High School	No new building.	Rezone all the high schools to better utilize existing facilities and relieve the pressure at Seven Lakes High School.
Taylor High School		Relocate students to Taylor High School from the larger schools. There are areas which make no sense which are zoned to Cinco and Seven Lakes.
McMeans/Taylor		Only 2 junior high schools in the district subject the students to a division of high schools to attend upon leaving, that being Beck and McMeans. It is patently unfair to the students. Friendships are lost after years of cultivating, and loyalty to high schools become divisive and confusing the students. The time has come to redistrict the attendees of the high schools...decide whether the 8th grade students proceed on to Taylor or on to Cinco. The decision, once made, should affect the next entering class without exception.
Roosevelt Alexander Elementary	The school size should be smaller to ensure a safe & productive environment. smaller school size promotes a closer knit community & students, parents & teachers have an opportunity to know each other better. Less crowd control measures & a relaxed learning environment for the students.	Something has to be done about the increasing number of portables installed every year, There is hardly any room left for the playground. I donot see any other solution than building a new facility. I n my opinion an elementary school should not have more than 600 students.

GROWTH

Taylor High School and Cinco High School	Over crowding of Cinco High could be resolved by rezoning neighborhoods off Fry Road to attend Taylor High instead of Cinco High	REZONE the neighborhoods to the schools that are closest to them, such as Lakeforest, Kelliwood Lakes, Lakes of Buckingham, Kelliwood Gardens. These areas are much closer to Taylor High but they attend Cinco High. McMeans is the Junior High for these neighborhoods which makes sense, but the students in those particular neighborhoods are a small group who leave McMeans and go to Cinco instead of Taylor. Taylor High school's enrollment is down this year and Cinco High is too crowded, therefore this would be a wise solution to begin making changes
Taylor High school		rezone to continue growth at Taylor -- neighborhoods south of westheimer Parkway should be zoned for THS-only one entire jr high is zoned to THS this would help with crowding at cinco hs and help THS continue its success.
Seven Lakes High School and Future High School	The 9th grade cafeteria need 2 lunch lines, but currently only has one. The children are delayed in getting their lunch, and cannot finish eating.	Add another line and cashier in the existing facility. Incorporate 2 lunch lines into the design of the new high school.
MPJH and THS	MPJH 1. Replace t-buildings with permanent structure or upgrade t-buildings	THS With the declining enrollment at THS, I think that there must be rezoning to have THS at full enrollment capacity. Perhaps all Land Use Zone 66 students need to be rezoned to attend THS and not CRHS. I understand that this is difficult for those families being rezoned, however it is best to use all our facilities to their full capacity. I would not support building new high schools when the district is allowing the enrollment at THS to decline. I am concerned the declining numbers will result in the loss of good teachers and programs.
Cinco Ranch High School/Taylor High School		Land Use Zone 66 does NOT want to move back to Taylor High School. We have established several (over 10 now) years of going to Cinco and want to stay there
Seven Lakes High School	1. More classrooms	Re-zone to shift student population from crowded to underutilized campuses

GROWTH

Cinco Ranch High School	I have a son at Cinco Ranch High School and a daughter in 7th grade. I understand that there a change that my neighborhood, Kelliwood Place maybe rezoned to Taylor High School. Please be advised that I OPPOSE this move and will fight it until my daughter graduates CRHS in 2015.	
Woodcreek Jr High		<p>1. As the area grows, consider re-districting. I know this is difficult for all involved but it is the best use of resources. I have heard that Cinco Ranch Jr High cut programs this year because of low enrollment while Beckendorff is busting at the seams.</p> <p>2. When building new facilities, choose the sites more carefully. Building WCJH without the basic road infrastructure needed to handle the traffic has put a lot of stress on my child and our family. I will not allow her to ride the bus because I drive behind the buses everyday. Their wheels are not even on the road (hanging over the edge in the ditch) at Falcon Landing & Gaston Road. As a result, we drive our daughter to and from school everyday. I would much prefer she ride the bus but I do not feel like this is a safe option. As soon as the road infrastructure is availalbe for buses to drive completely on the road, my daughter will ride the bus. The traffic is so bad on Gaston approaching Katy Flewellen that many cars are cutting through Grayson Lakes so their children are not late for school in the morning. I have contacted Fort Bend County several times and no one will respond. I would appreciate the school board expressing their</p>
Seven Lakes	Too many students already	Have Katy High annex Grayson Lakes. Everything around Grayson Lakes is already in Katy.
Seven Lakes High School		We support the redrawing of the attendance zones to balance the student populations among the KISD High Schools,beginning with the 2010/2011 school year.
Taylor High School	Return Land Use 66 to Taylor High School to save the school district money and prevent taxpayer increase	Redistrict children that were rezoned to Cinco Ranch from Taylor High School when Cinco Ranch was built.
Taylor High School		The district needs to utilize existing facilities before building new ones

GROWTH

Taylor High School	Level out the attendance for each school. Seven Lakes and Cinco attendance numbers should not be so much high than Taylors when it would be very easy for some of those students to move to Taylor. Until that's done there is not reason to build a new facility.	We need to quit using bond money to build new facilities until the attendance at the facilities we have are leveled out. When the attendance is not level programs are cut and that effects our kids and that's not fair.
Taylor High School		I believe that we should use existing buildings, such as Taylor High School, to their capacity and not build new schools.
Taylor HS	none	Add to Taylors student base before considering any new schools. Makes sense and costs VERY little.
THS	Increase enrollment to maintain current programs.	Rezoning surrounding sub-divisions from KHS and CRHS to THS.
Taylor High School		To take advantage of existing facilities and close proximity and a sense of communicy, consider moving all students from McMeans Jr High to Taylor HS as opposed to splitting them up now between Taylor and Cinco Ranch. It makes no sense with all the growth out West and the shrinking studen tpopeiulation at Taylor to allow this to continue. That would create a larger student freshman body into Taylor each year. That woudl allow Cinco Ranch to potentially absorb soem of Seven lakes growth
Taylor High School		Send all McMeans Jr High students to Taylor. Taylor's population is shrinking, so the school would be able to take more students. This will alleviate crowding at Cinco.
Taylor High School	Physical improvements to building integrity Why not update the exisitng facilities and redesign the boundaries, instead of adding and adding to the new facilities?	1. redesign the school boundaries located around Taylor. I find it really confusing on why Lakes of Buckingham and Highland trails would go to Cinco Ranch High School!
Taylor High School		Taylor's enrolment is decreasing. Rather than build new facilities why take the fiscally responsible approach and re-zone. This was done to increase numbers at Cinco, which has been achieved.
Taylor HS		Offer classes specific only to Taylor HS that would attract outside resources and students

GROWTH

Taylor High School		<p>I am a current resident of LUZ 66. I support the rezoning considerations of zone 66 returning to Taylor. This is not an emotinoally based opinion; I have had one child attend CRHS, and currently one that will enter 9th grade in the coming school year 2010. My position is based on two points. First, I was distressed to hear of the decline in population and related programs that naturally occur when a school is well below it's capacity. My hope is that KISD would support all of its schools in their desire to maintain their competitive edge in a district that has such an outstanding reputation. Second, from a demographic view, our distance from CRHS is twice that of Taylor. We don't live in or near to Cinco residents. In addition, I want to add that I know zoning in a large, fast-growing district such as KISD are of great difficulty. I want to thank all of you that put your time and efforts in to working on this endeavor. However, I would like to state that it is distressing to me as a property owner of this community for the emotionally based cries of the community carry such weight in decision making matters of such a large and technically dense issue. My hope is that the decisions made regarding the zoning of KISD can be made by the experts and those with the knowledge and experience to make</p>
Taylor High School	<p>By using existing campuses prior to building/adding temporary structures to campuses experiencing more growth, the district saves money, expands funding for existing campuses, and sends a message to existing campuses that they will be considered just as important to the future of Katy ISD as the new campuses being built. The excellence, history, and pride of the existing campuses are responsible for the continued growth of the Katy area and should be considered an integral player in the future. No Campus Left Behind!</p>	<p>Use existing campuses where enrollment is lower.</p>
Cinco Ranch High School	<ol style="list-style-type: none"> 1. please consider utilizing temporary buildings instead of rezoning Cinco Ranch HighSchool/Taylor and Seven Lakes 2. Children already at Cinco or Taylor would be affected by rezoning 	<ol style="list-style-type: none"> 1. Use tempoorary buildouts to accomodate the growth in schools 2. Allow students attending their current hghschools to remain and complete their highschool tenure at their current school 3. build another highschool to accomodate the growth at Seven Lakes High School

GROWTH

Taylor HS		Ensure enrollment is kept on par with other KISD schools. If THS enrollment is down and other HS's are too high, rezone to THS rather than building new schools. For example, all McMeans students should go to THS. They live closer to THS than to CRHS. Also, when will THS get bleachers that are on par to CRHS, MCHS, MRHS, and SLHS?
Cinco Ranch High School and Taylor High School		I have two children at Cinco Ranch High School and live in Kelliwood Lakes. If our neighborhood is rezoned back to Taylor High School, I would like to be reassured that my children will be able to stay at CRHS since they currently attend that school.
OKE,BDJH,W CJH,SLHS,new high school		<ol style="list-style-type: none">1. Provide online input for residents to submit when they will have children enrolled in Katy ISD that can be updated annually. Allow residents to input their needs for approximately 10 years out and send out emails to those who use it to remind them to update each year. This can help with planning for children not yet enrolled and can even benefit individual schools in planning for staffing.2. Reassess zoning lines for areas that are "built out" and adjust so the "final" zoning is based on geographics and population that is known. No area should be Grandfathered into a particular school simply because of past precedent.

GROWTH

<p>Katy Taylor HS</p>		<p>Enrollment is dropping at Katy Taylor while increasing nearer to Seven Lakes. Re-drawing school zones would re-distribute attendance more equally and better utilize our existing assets. Katy Taylor has been an excellent teaching facility and has turned out great students well-prepared for college and successful careers. And, we have a quality staff at Taylor led by a great Principal David Kendler. We need to fully utilize this facility and keep all of its programs will full enrollment. One obvious place to start is to aggregate kids from McMeans to all go to Taylor. It has never made sense to me that we bring kids together in Junior High at McMeans and then split up many of these friendships and relationships by sending half the kids to Cinco HS and half to Taylor HS. There are many kids that live closer to Taylor yet go to Cinco. If we need to grandfather the kids over time to accomodate, that's fine. I think the majority impacted would be supportive and all the taxpayers would definitely appreciate Katy ISD fully utilizing its asset base before spending any capital funds. Thanks for your consideration of this critical issue. I'm happy to help if needed.</p>
<p>Taylor High School</p>	<p>I am concerned about losing programs that will help the students at Taylor HS to continue to succeed. As enrollment declines, so does program funding.</p>	<p>Please consider re-zoning to level out the enrollment numbers. Apparently THS has approximately 2,500 students, while Seven Lakes will have close to 4,000 students.</p>
<p>Seven Lakes High School/Cinco Ranch High School</p>		<p>Please consider re-zoning the small neighborhood of Bayou Crossing from Williams/Beck/7 Lakes to Williams/Beck/Cinco Ranch. Bayou Crossing is the ONLY neighborhood in the district with this zoning and the kids do not get to attend high school with ANY of their elementary school friends. This is a big problem since many friendships are set in stone by junior high and it is harder to make new friends. In addition, the trip to 7 Lakes takes students through 4 school zones to get there: Beck, Alexander, Griffin and and Beckendorf. The trip to Cinco Ranch High would be much shorter, easier, and safer. I know that growth at 7 Lakes will be a problem in the future and this is an easy way to get Cinco more students that will also make residents happy. Thanks you so much for your sincere consideration of this option!</p>

GROWTH

Taylor High School	Rearrange the attendance zone among Taylor, Cinco Ranch and Seven Lake high school to balance the enrollment, fully utilize existing facilities and keep Taylor's good reputation on high academic achievement.	Taylor has been a great school and helped build the reputation of this district for many years and we need every opportunity to keep our standards high. We need an increased enrollment to protect our programs. The district needs to utilize existing facilities before building new ones.
Taylor High School	We need our enrollment to increase so that more programs are not lost. We have a great school that has helped build the reputation of this school district and the district has a responsibility and the ability to not let Taylor decline. There is no reason to build more buildings when rezoning would help this situation.	Same as question 3 above
Seven Lakes High School		Rezone

GROWTH

		<p>Taylor has been a great school and helped build the reputation of this district for many years and we need every opportunity to keep our standards high. We need an increased enrollment to protect our programs. The district needs to utilize existing facilities before building new ones.</p> <p>Since we know that Taylor High School enrollment is shrinking due to several factors including empty nesters and the lack of land for new home development, it makes perfect sense that K.I.S.D. needs to consider redistricting to solve the overcrowding issues at other high schools as well as the under enrollment at Taylor.</p> <p>I feel that with the current issues going on with our tanking economy, we as taxpayers cannot afford another tax increase to fund further expansion of the district when other options are available. Our current school board needs to realize that many homeowners are barely hanging on to what they own and if our dear president has his way, we will all succumb to his socialist agenda and lose most everything.</p> <p>What the board needs to realize is that to equalize the enrollment at our high schools we need to redistrict to allow for an equal student balance without affecting the tax rate.</p> <p>What stands out in my mind is the fact that students who attend Cinco Ranch and Katy High Schools pass Taylor students on the way to school. There are certain neighborhoods off Fry road that are actually closer to Taylor High School than Cinco Ranch High School and some students who</p>
--	--	---

GROWTH

Bonnie Holland	KISD needs to "open" up the district boundaries in order to fill Bonnie Holland to 100% of capacity in order to relieve the projected overcrowding at Stanley and Woodcreek (not to mention the possible overcrowding at Griffin. At this point, the projected capacity of Holland only shows to be 80% at peak enrollment. Not only is this an injustice to those in adjoining districts, but it is a misuse of the properties built at taxpayer expense.	
Cinco Ranch High School & Taylor High School	I have a freshman at Cinco ranch High School and a daughter who will be there in two years. For years I have heard rumor that my neighborhood will be rezoned back to Taylor. This infuriates me. I moved to Kelliwood Place 15 years ago and for the first six years my neighbors and I fought diligently to have our kids stay at Taylor high school. We worked very hard to have the school board keep us zoned there. I have lost more than 6 good neighbors who had to move in order to have their children attend Taylor. Each time we approached the board and begged to stay they thumbed their noses at us and told us it would never happen. Now here we are with our children and neighbors settled into Cinco Ranch High School and I hear we may be rezoned to Taylor within a year!!! I am furious. Why now? The board should have been able to predict the younger populations would move further west and Taylor would be stuck with a low student population (one of our arguments years ago) - it does not take a rocket scientist to see that. So, now my children are to pay the price. What happens when my son stays at Cinco Ranch High School and my daughter is zoned to Taylor? I am sure she will be grandfathered into Cinco due to her brother, but what do I do about transportation? I am sure the buses will no longer run since we would be rezoned.	
Taylor HS, Cinco Ranch HS, Seven Lakes HS	1. Ensure that Taylor does not lose programs.	Rezone. Taylor's student numbers have declined, Seven Lakes has too many students. Rezone neighborhoods that are closer to Taylor than Cinco Ranch to increase numbers at Taylor. Rezone some neighborhoods that are currently feeding to Seven Lakes in order to make up for the students rezoned from Cinco Ranch to Taylor and reduce the overcrowding at Seven Lakes.

GROWTH

Taylor High School		Utilize existing District facilities such as THS before building new high schools.
Taylor High School		<ol style="list-style-type: none"> 1. Rezone. All McMeans students should attend Taylor. 2. Do not take dollars budgeted for Taylor and distribute them to other schools in the district.
The High Schools		Evaluate attendance Zone to reallocate attendance to maximize use of existing facilities. Try to avoid building new assets while existing assets are underutilized. Look at the example of SBISD overbuilding capacity.
R. Alexander, Beckendorff & SLHS		<ul style="list-style-type: none"> * Cap enrollment by grade at each school * rezoning (yes, I said it..the "r" word)
OKE, WCJH, SLHS	Ensure that as new facilities are planned, Katy ISD demonstrates fiscal responsibility and maximizes use of existing facilities (through facility enhancements, rezoning, etc)	Rezone and fill the KISD existing facilities. As the district continues growth on outlying areas, we tend to zone "westward". With better planning, we create environment where schools become neighborhood/community/vacinity oriented and students don't have to travel "west" to attend school when other options are within walking distance.
Taylor High School	We need to focus on increased enrollment for this school in order to protect the current programs we offer our students. We DO NOT need new facilities, our existing facilities will accommodate our needs.	
Taylor High School	Instead of incurring new costs on temporary buildings to ease overcrowding in newer schools, redistribute attendance numbers to keep Taylor High School attendance in a place where the children do not lack the programs they need for success.	Instead of building or adding more to a newer campus, rezone Taylor High School to more evenly distribute district attendance so the school doesn't lose money for needed programs and can remain a viable campus for the district.
Alexander Elementary	Our third, fourth and fifth graders are out in portable buildings. None of these have bathrooms or sinks, so our children are walking outside to get into the main building.	We went to school in Louisiana with portables as well. However, they were attached to the main building's halls. You didn't know when you were inside the main building or outside in a portable it was flawlessly attached and beautiful.
Taylor High School	We want to be rezoned to Taylor from Cinco Ranch High School	Rezone Kelliwood Gardens to Taylor High School. It is much closer to our subdivision and Taylor is every bit of a fine school as Cinco Ranch. Please move us to Taylor!
Taylor High School	Rezoning to boost enrollment at THS and alleviate overcrowding at CRHS and SLHS	Rezone and T shacks

GROWTH

Morton Ranch High School :)	We want Mr.Camarata, Coach Svendsen, Coach Haug, Coach Orsaugh and Sam Carter back.	Expansion, we do not want more t buildings.
Taylor High School		Taylor has been a great school and helped build the reputation of this district for many years and we need every opportunity to keep our standards high. We need an increased enrollment to protect our programs. The district needs to utilize existing facilities before building new ones.
Financial Constraint - Not listed above as an option	Katy ISD should only plan long-term facilities that can be paid for without a property tax increase. Property taxes in KISD are among the highest in the nation and many in the district are suffering financially and cannot afford ever increasing property taxes. I am retired and living on a fixed income so it is very difficult for me to pay my current taxes much less even more in the future.	Only build what can be paid for without increasing property taxes.
Seven Lakes High School and feeder schools		Seven Lakes has too many students while other schools are under. No schools should be built until some rezoning takes place and brings all the current schools to as close to even numbers as possible. I grew up in this district and am truly saddened to see that the districts answer to growth is enormous schools where children become a number and it seems no one is invested in whether that child is flourishing in that system, or simply dying on the vine. My parents moved here because of the school district back in the late 60's. It was small, but had wonderful caring teachers, normal size schools, great leadership, and the class size was not out of hand.
Taylor High School	<ol style="list-style-type: none"> 1. With district growth I want the district to utilize the existing buildings and re-zone kids to keep enrolment up at the older schools BEFORE building new schools. 2. I don't want Taylor to loss staff/electives because of low enrolment while we have overcrowding at new schools. 	I think the school boundry lines should be re-done to keep enrolment up at Taylor. There is no reason to have a school at 4000 students and a school nearing 2400.

GROWTH

Seven Lakes, Cinco Ranch and Taylor high schools		The attendance boundries are a little ridiculous. My child goes to Seven Lakes which we live 7 miles from and we live 2.1 miles from Cinco Ranch. I think the boundries should be drawn for Jr. Highs and have those schools feed into the high Schools. Seems to be more logical to split kids as up as they go into Jr. high as opposed to splitting classes up going into High School
SEVEN LAKES HIGH SCHOOL	NO IMMEDIATE STRUCTURAL IMPROVEMENTS NEEDED, CONSERN IS FOR STUDENT POPULATION	GOOD QUESTION. ALREADY OVER POPULATED AT HIGH SCHOOL LEVEL. RE-DRAWING DISTRICT LINES IS NOT THE ANSWER AS THE GROWTH IN THE SW AREA HAS MUCH TO DO WITH FAMILIES WANTING THEIR STUDENTS AT SLHS.UNFORTUNATELY I HAVE MORE QUESTIONS THAN ANSWERS.
Sports stadium, high schools		2.Consider rezoning grades 9-12 when opening new high school, but if possible allow seniors the option to remain at their 'old' school, but only if they are able to provide their own transportation. 3.Do everything possible to avoid re-zoning high schools unless the rezoning is associated with opening a new school.
Seven Lakes	<ol style="list-style-type: none"> 1. Provide the facilities needed for the kids to finish at the school in which they started in order to assist them with social, as well as, acedamic development. 2. Provide facilities in a timely manner that will provide for a solid education without interferring with #1 above. 	Build ... Build ... Build. The area is still a solid housing market even in a down market time. Solidify your plans based on solid analysis and move forward all the while keeping the childrens social development, as well as, academic development in mind. In other words don't be forcing kids to switch schools once they start.
Seven Lakes High School		Allow students who have attended SLHS for 2 or more years to complete their education at this school. Perhaps begin the new high school as you did with SLHS....Freshman and Sophomores only....and add each level over the next two years.
Stanley Elementary, WoodCreek Junior High, Seven Lakes High School		Seven Lakes is growing rapidly. Several students are zoned to SLHS that live just as close to Taylor. Rezoning is probably the best option for alleviating the attendance growth, especially until new facilities can be built.
Taylor HS	increase student enrollment	moving Land Use Zone 66 back to Taylor High School

GROWTH

Seven Lakes High School (but pertains to all junior high and high school campuses)		Sometimes boundaries need to be redrawn based on population instead of emotion.
Taylor HS, Cinco Ranch HS, Seven Lakes HS	rearrange the attendance zone among Taylor, Cinco Ranch and Seven Lake high school before they start building another five-star high school. This is the way to keep Taylor's good reputation by not dropping the enrollment and losing the funding for all those good programs.	rearrange the attendance zone among Taylor, Cinco Ranch and Seven Lake high school before they start building another five-star high school. This is the way to keep Taylor's good reputation by not dropping the enrollment and losing the funding for all those good programs.
Kilpatrick Elem, Woodcreek JH and Seven Lakes HS	<ol style="list-style-type: none"> 1. Look to keep the schools all within capacity. Some will never be even close with the current boundaries where others will be always overcrowded. 2. The kids are not really affected in the classroom by the overcrowding and I commend you for that, but it affects the administrative function of the school and stress on the teachers and parents. 3. Overcrowding can lead to some programs losing priority as there are more pressing issues for parents and teachers to take care of. 	Set the attendance boundaries with some logic. And look ahead. A few years ago your professional demographic company had our area listed at 0.75 children per house! We averaged 2 children per house and most are in Elem school.
Rylander Elementary	Overcrowding - I'm not sure this is a growth issue, but this school is seriously overcrowded. The number of students, over 1200, is too many for an effective campus management plan to be optimized. Our staff is doing a very good job, but could do more if a more reasonable student count was achieved. Programs are restricted due to sheer numbers of kids and families that come to events. Families can't feel included if there are too many to comfortably fit.	
Seven Lakes High School		Re-district for 2010-2011 school year to keep numbers at each high school more equal, rather than SLHS being the only school with huge over-enrollment. 4200+ by 2012-2013 school year is completely unfair to these students.

GROWTH

Beckendorff Jr. High and Seven Lakes High School	1. The overcrowding of both Beckendorff and Seven Lakes due to parent run rezoning.	I believe you need to look at the attendance boundaries and readjust so that all campus's in the southwest are equally distributed. Several campus are below their capacity numbers while Beckendorff and Seven Lakes are overflowing. It won't be a popular decision but one that must be dealt with to give these campus's relief. Student learning is affected by overcrowding.
SLHS;BDJH	1. less student enrollment	redraw boundry lines
SLHS	<p>Overcrowding...I support any effort to at least get the the ninth grade wing of the new high school built and keep all ninth grade students at that facility until a split can be made when the enitire school is then finished. Many 9th grades are not with the high school in other states and it seems to be the best option to a horrible overcrowding issue.</p> <p>Who's idea was it to not at least attempt to pass the bond last year and get address the overcrowding issue? I'm horrified of thelack of planning in my two years experience with Katy schools and new schools like WCJH and SLHS already having portables. This is unacceptable.</p>	<p>Use the new junior high for all 9th graders.</p> <p>Potentially, you could use a block system, like universities do, although busing costs may be an issue.</p>
High Schools (Taylor High School)		Rezone in order to balance student populations
Taylor Highschool	Change the school bounderes to fill the school and postpone having to build another school.	Make sure all existing schools are full even if this means kids having to change schools.

GROWTH

Cinco Ranch HS, Seven Lakes HS	<p>We are writing as a parent of a student at Beck Jr. High and was wondering if there is any possibility of revisiting the issue of rezoning our neighborhood of Bayou Crossing from Seven Lakes High School to Cinco Ranch High School for the upcoming school year of 2010-2011. There are a couple of reasons for this: First of all, it is well known that Seven Lakes is becoming overcrowded, and upon information and belief, while Cinco Ranch is being underutilized. Secondly, is the fact that Bayou Crossing is the only neighborhood that was fed into Beck from Williams that will not be attending Cinco Ranch. Friendships and long-term associations will go by the wayside and for some children that may be difficult. I realize that both of these schools are excellent schools, and everyone should have the type of dilemma we have here in Katy (ha!). We also realize that children are often more resilient than we may give them credit for, but as tax payers, (and if it is true that Cinco is underutilized), we would like to not see our child in overcrowded classes.</p>	
Taylor High School	Relieve over crowding in our high schools.	Rezone to use existing facilities and relieve over crowding at other locations.
Seven Lakes High School		Rezoning students to the north of school temporarily to another High School until the new school is built as to not cause a large majority of students to have to change schools twice or build a 9th grade center early as was done for Cinco Ranch.

GROWTH

Williams Beck CRHS SLHS	n/a	Fix the feeder patterns for our neighborhood, Bayou Crossing, which is the only neighborhood that feeds into Williams elementary that does NOT feed into CRJH. That means we "change" area superintendents, our kids lack continuity with friends, and uniquely this year, we lose continuity with previous administrators who are familiar with our kids' individual needs and would not need to spend a lot of time coming up to speed. Also, the students and parents would not need to relearn new systems at CRHS and would be able to help transition their children more easily. Also, as SLHS will be very overcrowded next year, it is in my son's best interest to attend a non overcrowded school so that his individual needs can be met.
Williams/Beck/Cinco/7Lakes		Look @ elementary/Jr. high feeder patterns...Bayou Crossing is the only subdivision from Williams to go to 7 lakes
James E. Taylor High School	1. Student Programs-my concern is that programs will not be offered to THS students due to the lack of students. Rezoning would solve this issue and keep THS from becoming a closed down spring branch school or closer to home, a wolfe elementary which may have to be used for something else.	Rezoning. As a growing district, my concern is that we spend tax dollars on portable buildings and/or new buildings when THS is well and able to educate more students.
SLHS		Instead of addressing the attendance growth of SLHS by building another high school for the south and southwest growth, keep these neighborhoods at SLHS and shift those neighborhoods north of the school back to Cinco and then some of those relocate to Taylor.
Beckenforff Jr High and Seven Lakes High School	Both are great schools but are both overcrowded due to the significant growth. I know that rezoning is an incredibly emotional process for all involved (we moved to stay in the schools we are currently in) but rezoning is a necessity to equalize school enrollment and the rezoning needs to make sense. Controlling enrollment will ensure continued safe environment for all students to be successful in.	First, rezoning...but it needs to make sense. There are neighborhoods that have kids bused over 3 miles to a school when one is in walking distance. That is financially irresponsible as well as playing obvious favoritism towards one group. I am not sure why some of these individuals have such influence over all of our tax dollars as well as control over things that effect all of our children.
Taylor High School	Maintain student programs	Rezone and use existing buildings to capacity

GROWTH

WCJH/SLHS		A "back to the drawing board" approach to rezoning (WITHOUT parent involvement) for all Katy ISD Campuses. With the delay in buiding new facilities the district should be better utilising the schools it has and adopt a logical approach to zoning.
James E. Taylor H. S.		Rezoning so that more students will feed into THS - for example, all McMeans students should be zoned to Taylor - this would also ensure that friends made in middle school do not split up when they reach high school
Cinco Ranch HS & Taylor HS	<ol style="list-style-type: none"> 1. Lake forest of Kelliwood is zoned at the moment for Cinco 2. Would like to remain zoned for Cinco NOT Taylor. 	Not sure. We bought in Lake Forrest because it is zoned for Cinco not Taylor. talk to city planning board to stop building more apartments.
Taylor High School	To keep Taylor as a viable school, redirect attendance so that Taylor continues to stay competitive and desirable	Redraw lines
taylor high school		I would like to see Land Use Zone 66 returned back to THS. This was given to Cinco when Taylor was deemed "overcrowded, but now I would say that this situation has changed and Taylor and Cinco would both benefit from this rezoning. It is essential for Katy ISD that all high schools be kept at above-par standards so that we do not become lopsided. Therefore, it is vital that we keep the tax base for each school in balance to support continued growth and exceptional curriculum at each school. Please help keep Taylor a top-quality school! By maintaining this quality and utilizing the Taylor facility to its capacity, it can help avoid the need for additional buildings in the near future.
Cinco Ranch High School, Taylor High School	Improve or maintain the affective aspect of High School experience by providing continuity throughout the four years - if rezoning must happen, let those who have started at Cinco finish there and offer alternatives to younger siblings, with transportation resting on parents. Preserve the strength of community and emotional safety of a familiar environment for students by phasing in rezoning gradually. Neither campus has such out of balance numbers that it is an emergency situation.	Make change less painful by allowing students to complete high school where they have started. Offer a grandfather option to younger siblings if parents arrange transportation.
Seven Lakes High School	Total enrollment must stay at or below capacity #1 Rezone to balance enrollment at exisiting campuses #2	REZONE to balance enrollment at existing campuses!

GROWTH

Cinco Ranch HS and McMeans JH		The only real answer here would be to expand existing facilities to accommodate growth if new facilities are not a possibility. I understand that there is a push to rezone school zones. I totally oppose this because (1) I picked the area I wanted to live based on the school zone and I do not want YOU to change that for me. Second, it is NOT in the best interests of the kids to abruptly change their school environment, particularly in the Junior High and High School years. My particular situation is the Taylor rezoning push that some Taylor parents are pushing DO NOT do this. I did not choose for my kids to go to Taylor and YOU do not have the right to make this for me.
Cinco Ranch High School	Enhances student growth & success Ensures a safe and functional learning environment Supports curriculum Addresses district growth	I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation.

GROWTH

<p>Cinco Ranch High School/Taylor High School</p>		<p>As a resident of Kelliwood Gardens, I feel that this particular geographical neighborhood has been in this zoning tug of war too many times. I have a sophomore that this rezoning will impact. She has previously been impacted by a school rezoning at a pivotal time in her life. She was moved from Creech to Exley to complete the fifth grade while we were residents of Kelliwood Pointe. She now attends Cinco Ranch High School and is a member of the Dance Team, a goal that she has worked towards for many years. To remove her again from the environment that she has become familiar with to an unfamiliar environment, but also to one where she possibly would not be able to participate as a member of a team that she currently is a member of, not to mention the expense that has been incurred by me for her participation seems unfair. I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation.</p>
<p>Cinco Ranch</p>	<p>"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p>	<p>"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p>
<p>Cinco Ranch</p>		<p>Why are neighborhoods that go to KHS NEVER addressed when it comes to rezoning! I am also very concerned about our property values as Cinco is rated higher academically than Taylor. I don't want to see my child take a step backwards.</p>

GROWTH

CRHS	I feel truly Blessed to send my girls to CRHS. I currently have a junior and would follow with a 7th and 6th grader. My 6th grader plans to become a cougar star like her big sister.	Why pull a small territory from the loyalty we have for CRHS. You would make us take a step back to go to Taylor. Are you trying to make us move? Please don't change our school.
CINCO RANCH HIGH SCHOOL	ENSURES A SAFE AND FUCTIONAL LEARNING ENVIROMENT.	"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation." 
crhs and feeders	1. move up the time table for additional high school 2. planning for slight increase in population at 7 lakes	building new buildings is ONLY way to address additional growth at existing campuses.
MMJH, CRHS, THS, SLHS, BJH		I totally understand and agree with the need to ease overcrowding at SLHS and utilize the THS facility before issuing more bonds. However, I am pleading for generous grandfather clauses and sibling clauses. I believe that families with students already at one campus should not have the burden of supporting 2 high schools. I also believe that students who are already attending a high school should not be forced to change schools. The high school transition is hard enough without the added stress of readjusting to a second high school.
cinco	DONT MOVE AROUND KIDS DAMNIT	LET THE CURRENT FREASHMAN STAY AND THE REST GO
cinco ranch hs	please allow children already attending cinco (zone 66) to be grandfathered and not forced to change high schools.	grandfather permits
cinco ranch high school		keep it the same
Seven Lakes	As Seven Lakes gets more crowded, the district should keep the feeder junior highs together at the same high school. Have all Beck kids go to Cinco, Beckendorff, Wood Creek, and new junior high to Seven Lakes.	Keep all Beck children feeding into the same high school - Cinco. That way the kids don't have to split between schools. This would also help eleviate some of the overcrowding. Start this fall of 2010. Juniors and Seniors can stay at Seven Lakes, underclassmen would move to Cinco or have the choice of staying. Siblings would still feed into Cinco.

GROWTH

Cimarron Elementary, WoodCreek Junior High, Katy High School	Cimarron Elementary--New bathrooms/sinks in open area, walls in open area	
CRHS	I have 3 children one currently @ CRHS & do not want to have them @ different H.S.	Stability is needed, and it seems that every 5 years rezoning occurs. Question - What happened w/ Alexander Elem. Why is 1/2 their school in portables? In 5 years won't this also impact the H.S. long range plan? There are other Elem. Schools that have many portables. How is this going to be handled in the long term? When these numbers decline, if they do, will there be more rezoning?
CRHS current student in luz66	District growth Student program My child is best served by remaining at CRHS. He is currently involved in athletics and we are extremely happy with All programs at CRHS.	Temporary Buildings. These subdivisions are also old and number of students will go down naturally just as they have at Taylor.
Taylor High School/Cinco Ranch High School		My son is a freshman at CRHS. I do not want him rezoned to THS nor do I want his brother and sister going to a different high school than he went to. Please allow a grandfather clause that will allow him to finish his high school years at CRHS as well as allow his brother and sister to have the same alma mater. We have lived in Kelliwood Place for 10 years and the whole time he thought he was going to CRHS. Therefore we have spent the last 10 years supporting anything Cinco Ranch High School. Please make this decision wisely. He will be very upset to know that he has to change high schools. We all know how difficult it is to make new friends. Please do not make him do it again in the difficult teenage years. Thanks for listening.

GROWTH

Seven Lakes	Appropriate student body size	Rezone Cinco Ranch High children North and East of Westgreen to Taylor. Rezone Greyson Lakes subdivision to Katy High. Begin zoning new subdivisions growing West of Katy Gaston Rd, relative to proximity to either Seven Lakes, Cinco or Katy High Schools, and do so in order to attempt to maintain an equivalent student body size between the three. Rezoning should be restricted to new growth areas only, however, if existing students are to be impacted for 2010-11 then liberal grandfathering must be administered for those students and siblings.
Cinco Ranch High School		We ask for our current son attending Cinco HS not to be moved to Taylor and a Generous Grandfather clause to allow his sibling to attend Cinco HS following his completion in McMeans.
Hayes, McMeans, Cinco/Taylor		Allow kids who are already in a school to remain there, and also allow siblings to attend the same school.
Cinco Ranch High School	No improvements	As I understand it the boundaries for Cinco Ranch attendance are under consideration for change. I would suggest that a grandfather clause be implemented such that students currently attending this high school or others would be given a choice of staying at their current high school versus attending another high school. Future growth would be accommodated by new students attending the rezoned schools according to the new boundaries and as a result of those wanting to commit to a high school under the new boundaries. This would minimize the disruption of students along with the associated drop in confidence and familiarity. The end result would enhance scores and the planning for higher education and entry into the market place.

GROWTH

Seven Lakes High School		I was able to obtain 2009 Katy ISD campus enrollment information from a friend who received this information through an Open Records request. Taylor High School having an enrollment of approximately 2,500 students with a capacity of 3,000 is unacceptable considering little growth will occur in THS's attendance zone any time soon. Though many solutions to this exist, I believe some CRHS students should be rezoned to THS, and some SLHS students subsequently rezoned to CRHS. This rezoning could take place this spring, and go into effect in the fall of 2010 for freshmen and sophomores. Having SLHS enrollment topping 4,200 in 2012-2013 while Taylor HS hovers around 2,500-2,600 just is not fair.
Taylor/Cinco	Rezoning and the for a generous grandfather clauses and a generous sibling clause. I feel this is important to those of us that are effected by your decions. I understand your needs and I also understand that you have to redraw the lines to fill the current enrollment problems.	I am a Katy grad and I understand the groth problems we face. I also understand that the line has to be drawn somewhere. But to take the kids that have been going to thier school and change them in mid stream in not the answer. Imply the grandfather clauses and sibling clauses for these families.
CRHS		Grandfather students currently at CRHS (or any school) if rezoning occurs.
new ones		Watch how you are rezoning the kids. You have plans to build an elementary in zone 74h were there are no houses yet when you were suppose to build in stanley elementary in 67c first. I understand why you switch it but Kilpatrick and Woodcreek are going to be over capacity and building the elementary in 2012 could help overflow from all the three elementaries. 74h only helps stanely which will only have been there for 3 years. Holland Elementary is right there and can help overflow from Stanley Elementary also.
West Memorial Elementary	2)Send apartment complexes that are east of Mason Rd. to Nottingham Elem where they have classrooms that are not used.	Adjusting boundaries and making sure all facilities are carrying their share and are not overburdened.
Seven Lakes High School		I believe there should be rezoning to Taylor High School, but I am now at Beck and wish to remain zoned to Seven Lakes. I also think that once we are there (which will be next year) we should be allowed to stay for the duration of High School.

GROWTH

Cinco Ranch High School		<p>I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p> <p>☒</p>
Cinco Ranch HS/Taylor HS	<p>Understand the need to redraw district lines - but would like to see generous consideration given to grandfathering all attendees of Cinco Ranch who might be rezoned to Taylor. This includes Freshman - Seniors.</p>	<p>District lines need to be redrawn. We are asking the board to consider the current enrolled students at the various high schools. They are entricate part of each high school. As such if a child is already enrolled in that high school, they should be given the option from Freshman to Seniors to finish at the school they are attending in the 09/10 school year.</p>
McMeans/Cinco High	<p>Neighborhoods on the north side of Westheimer Parkway that are currently zoned to Cinco.</p>	<p>No new suggestions, just please consider leaving those Kelliwood Pointe and Kelliwood Links at Cinco High as our back entrance/exit is directly on to Cinco Blvd.</p>
CRHS / Talyor HS		<p>Please have a generous Grandfather clause for those students that have started their high school years with CRHS. It was hard enough for some of those kids to be split from their friends when they left junior high. Please don't uproot them and make them "start" over with getting use to a new high school campus, new teachers, and making new friends,.</p>
cinco		<p>"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p>

GROWTH

Cinco		I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation.
cinco ranch high school	leave the adress district growth alone. if u are to start , start off with a new class... our students have already created bonds and friends with these students soooo PLEASE do not send our fellow students away. thank you	leave the adress district growth alone. if u are to start , start off with a new class... our students have already created bonds and friends with these students soooo PLEASE do not send our fellow students away. thank you
Cinco Ranch High School/McMean Junior High School		I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation.
Cinco Ranch High School/Taylor High School	I live in Kelliwood Gardens and have a senior and a junior. 1st - I do not want to see my neighborhood zoned to Taylor HS. 2nd - There should be a very generous grandfather clause for those already attending Cinco and siblings to be allowed to stay at Cinco Ranch.	Whatever you do - stop rezoning kids!! Add portable buildings, encourage attendance at Wolfe, figure it out without rezoning our neighborhood. We begged to be zoned to Taylor a few years ago when this issue came up but were ignored. NOW you want to zone us to Taylor after kids were torn from their friends and forced to make new friends and connections at Cinco Ranch?!
Cinco Ranch/Taylor	I understand that LUZ66 is being rezoned to Taylor after years of us trying to get zoned there so the kids at McMeans would not have to be split up. Our concerns were never taken into account. Now our kids are at Cinco and want to stay. Please take this into account and allow the kids that are currently at Cinco to be grandfathered in. Now that they have made new friends and are part of the school it is unfair to rezone.	

GROWTH

CRHS & THS	Rezoning of current CRHS students to THS would make us move to a neighborhood that feeds into CRHS under any new zoning plans.	If the issue is too large of numbers at SLHS - why is KHS not also looked at as a relief? Are neighborhoods in close proximity to the west of THS - but that attend KHS - being considered for rezoning to THS? KHS numbers could then be adjusted to accommodate children living in close proximity to KHS, but are zoned to SLHS. We attend CRHS and love, in particular, the award-winning Fine Arts Dept. that we've been family to for the past 3 years. We also have a 6th grader & most definitely want him to attend CRHS as well. Rezoning would mean moving for us, or if allowed, a generous exception to younger siblings of CRHS alumni.
Seven Lakes	Do not re-zone Beck students to Cinco Ranch HS. If Beck students are moved to Cinco, we most likely will end up going to a private HS.	I don't think there is much choice but to build new facilities on the western portion of the district.
Seven Lakes High School	My number one and only priority is to those of us who live in the Kelliwood Greens neighborhood. We are currently zoned to Seven Lake High School and wish to remain there, to help enhance our students growth and success. They need consistency and remaining at Seven Lakes rather than be rezoned would be in their best interest.	I believe all current Kelliwood Greens freshman level and above (any student this 09-10 year) should remain at Seven Lakes High School or "grandfathering" them into Seven Lakes. In addition any sibling of those current students should be given the option of attending Seven Lakes or Cinco Ranch High School so it will not create an issue for those parents who drive their children to school. Thank-you
Cinco and Taylor		I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation.

GROWTH

Cinco and Taylor		<p>"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p> <p>We are new to the area and did lots of research as where we needed to buy a house to ensure our children went to the school that we thought would best suite our childrens needs. I would be very upset and then send my children to a privete school if you decided they needed to be redistricted. As a parent I try to so the best for my children as I can, to just move to the area and put them in a new school and then to have to do it again is very upsetting to me.</p>
Mcmeans and CRHS	<p>I live in LUZ 66. I have two sons. My oldest is currently a junior at Cinco, and my youngest is in 7th grade at McMeans. We are very happy at Cinco, and would like to stay there, but certainly understand the reason for the possible rezoning. I also teach 7th and 8th grade at McMeans. My biggest concern is keeping all of McMeans together. Taking LUZ 66 to Taylor, but not the rest of the students curently zoned to McMeans and CRHS seems like a very sad situation for the few that remain at CRHS. I also feel like the sooner you do all of this, the better. Start with the current 8th graders.</p>	<p>Please see my #3 comments, and feel free to contact me. I am trying to keep a very open mind about this situation. I have lived in this area for a long time, and understand the demographics very well. KISD has my full support.</p>

GROWTH

Cinco Ranch		<p>It is important that existing students stay in the same environment where they have begun to fit in and make friends. Changes in high schools causes insecurity and behavioral issues does not enhance learning. I do NOT want to be rezoned and neither do my children. If rezoning does occur I would want existing students be allowed to finish at Cinco, and in addition that younger siblings be given an option of attending Cinco with parents providing transportation.</p>
Cinco Ranch High School	<p>I believe Cinco Ranch High School adequately addresses all facility improvements that are needed for educational needs of our kids.</p>	<p>"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."</p> <p>This really concerns me the most. How some arbitrary ruling could abolish a KISD tradition if a proposed rezoning occurs. We need to protect our kids from being forced to start all over again certainly when there is a family tradition at Cinco and a big reason why we moved to KISD 9 years ago.</p>

GROWTH

Cinco Ranch	<p>My appeal is more to do with the softer side, than the bricks and mortar. More helping teachers in classroom. This will address the need for students that are not in the normal to upper level of academics. This will aide in their personal success, confidence, and growth.</p>	<p>I have recently heard the district is rezoning to address the growth without having to build new schools. I applaud this approach, yet am concerned of the manner by which it is done. I beleive it is essential to allow existing students in each High School to remain until graduation, or a least given the choice. There are several issues related to this which I can elaborate on if you would like to give me a call. I also believe if there has been a support system and loyalty of younger sibilings in Jr. High, by which they should be allowed to attend the current feeder high school.</p>
Cinco Ranch High School	<p>I am extremely happy with CRHS. I think that the existing students of the school will be best served by being allowed to continue attending there.</p>	<p>I live in Kelliwood Gardens, and want my children to continue to attend Cinco Ranch High School. When I moved to Katy 6 years ago, it was a specific requirement for the house we purchased. I ask that we not be rezoned. My children should not have to switch schools because of declining enrollment at Taylor, and out of control construction to the south of us. It appears that the new schools planned for 2013 will alleviate this problem - I would prefer to see temporary measures used to accomodate the existing students until then.</p> <p>If rezoning must occur, I ask that existing students, and their younger sibilings be allowed to attend Cinco Ranch with parent provided transportation. This would give me the time needed to sell my existing home and buy a new one in the CHRS boundaries - since my oldest child is 17 and the youngest is 10, moving would be our only option at that point.</p>
Cinco Ranch High School	<p>Students need a stable,secure place for continuity of instruction within their community,and not attend school with the fear of being rezoned.</p>	<p>If rezoning must occur then students currently enrolled and their sibilings who will attend CRHS should be given the option to stay.</p>
CRHS		<p>If schools attendance zones are redrawn a strong grandfather policy needs to be included to allow students to complete their high school education at their current campus.</p>

GROWTH

Cinco Ranch		"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation."
Cinco Ranch High School		Rebalancing the attendance on the north side would ease the crowding at Morton Ranch High School and add attendance to Katy and Mayde Creek High Schools. The South side schools are fairly balanced. Seven Lakes is a little smaller but will catch up with Cinco Ranch and Taylor when the building boom starts back up.
Cinco High & Taylor High	Limit rezoning to minimize the effect on students currently enrolled in a particular high school.	We should allow existing students to stay in the same school environment where they have begun to fit in and make friends. This enhances their feelings of security and will result in fewer behavioral issues and enhanced learning. I would ask that in any rezoning, children not be moved involuntarily from a school where they are currently in attendance. If rezoned, existing students should be allowed to finish at their existing school. Lastly that younger siblings be given an option of attending the school attended by their older siblings with parents providing transportation.
Katy High School		I want my children to continue attending Katy High School, so I do not want them to be rezoned to another high school in Katy. I live in Governor's Place subdivision.
		Please do not rezone Kelliwood Point to Taylor High, as the school becomes a distance for us and Cinco high is a straight 5 minute drive down Cinco Ranch blvd.
West Memorial Elementary		rezoning - getting apartments from Kingsland to attend Nottingham - which is closer

GROWTH

Cinco Ranch High School		"I feel that letting the existing students stay in the same environment where they have begun to fit in and make friends causes them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco, and third that younger siblings be given an option of attending Cinco with parents providing transportation
Taylor High School		Have McMeans go 100% to Taylor. Rezone to "fill up" existing schools, before you add another high school
CRHS, THS		If rezoning from one established HS to another is considered, all current students of the school, and their siblings MUST be "grandfathered" and allowed to stay at their current school if they so choose. It is not reasonable to ask these students to leave their schools after they have formed friendships, relationships with administrators and have become involved in school programs. Administration highly encourages them to get involved, whether it be sports, dance team, FFA, etc... they should not be asked to leave these programs if the district decides to rezone. Generous grandfathering for all students, regardless of what grade they are in needs to be implemented.
Need to build the 7th high school so there is not overcrowding		We need new facilities. The high schools are too large. They are the size of small colleges. In addition, Rylander needs to have the preschool and Life Skills classes moved to an elementary that has lower enrollment.
Stanley Elementary, WoodCreek JH, Seven Lakes HS		only new buildings!!!
James E. Taylor High School	Transportation traffic going and coming into the 9th grade center and into the main parking lot. Special needs buses also add to the traffic issues.	Taylor doesn't seem to be having a growth problem. It looks like it would be common sense to redraw the boundaries so that Nottingham subdivision is not divided and all go to Taylor instead of Cinco. Then the same could be done for Seven Lakes and Cinco.

GROWTH

Williams, Beck, Cinco Ranch HS		To consider true feeder patterns. They are absolutely the best scenario for the kids.
Cinco Ranch HS and Taylor HS		I would not rezone current students to other schools and allow siblings of current students to go to the same school that their older siblings went to. These are difficult years for many children and this type of disruption is not necessary
BHE, Beckendorff		
High School realignment	<ol style="list-style-type: none"> 1. grandfather a student to finish at their high school 2. Allow siblings to start and finish at that same school 	Allowing the current alignment to remain in place for current students and their siblings.
Taylor High School		<p>Rezone the current student population to ease high attendance levels at Cinco Ranch and Seven Lakes. While the student population at Taylor High School is decreasing, Cinco Ranch and Seven Lakes are seeing large increases in their student enrollment due to neighborhood development. There is no room for increased housing in the Taylor attendance zone; however, there is room to increase the student attendance levels. There are currently several subdivisions that attend Cinco Ranch High School that are closer to Taylor High School in distance that could be rezoned to Taylor thus making more space at Cinco Ranch for some of the Seven Lakes students. This will also help ensure that Taylor High School maintains its high standard of excellence. It's important to remember that Taylor has been a great school for many years and has helped KATY ISD establish itself as a leader in top rated school districts in the Houston area. Taylor needs increased enrollment to protect the programs it offers its students and the district needs to utilize existing facilities before building new ones. In this time of a nationwide recession, KATY ISD needs to do its part to curb excess spending wherever possible. I grew up in the Spring Branch Independent School District and it is my hope that KATY ISD</p>
Taylor High School		It is important to maintain the student population at Taylor HS so that programs are not affected. McMeans JR High should not be split among highschools. All these students should attend Taylor keeping it a pure feeder school. This benefits both the community and the students.

GROWTH

Taylor HS		send more students to Taylor HS. Perhaps the district could save a few million in the process. Alos, keep Eric Duhon on staff at all times!
Taylor High school		Re-evaluate attendance zones for existing schools & facilities to optimize use of those facilities.
Taylor HS		Rezoning the neighbourhoods that go to McMeans Jh to all feed into Taylor HS
Cinco Ranch HS and Taylor HS rezoning	Allow students currently enrolled at their HS to be grandfathered to finish at that school, and that of their siblings as well.	Allow students currently enrolled at their HS to be grandfathered to finish at that school, and that of their siblings as well.
High schools		I just hope that if the powers that be are looking at rezoning prior to a school being built that it be considered how difficult it is to move kids from existing schools to existing schools. I would think that any kids who are currently enrolled in high school should not be considered as potential moves. They have already invested themselves in their schools, auditioned for fine arts, tried out for sports teams, etc. It will be hard enough to get families to adjust to these changes, but to move teens from one high school to another after they have been enrolled will be upsetting to the community and I think very difficult for the kids...Just my thoughts...
Taylor/Cinco and MPJH/MJH	It is about time you moved Kelliwood to the closer High school. This will save time daily for our kids travel. Now you need to do the same for our Junior High as well. We are directly across the road from Memorial Parkway JH and we have to drive 4 miles to McMeans JH...what a waste of time and resources. Please get that change going as well with the roll out of the High School change.	Move the Kelliwood neighborhoods to Memorial Parkway JH (which is across the road from our sub-division)instead of us driving all the way to McMeans JH while you implement the change of moving us to Taylor HS. Make the change to our JS at the same time you make the change to our HS.
Williams Beck CRHS SLHS		fix feeder pattern for Bayou Crossing: it is the only Williams neighborhood that goes to SLHS; all the rest go to CRHS. That will relieve crowding at SLHS.

GROWTH

Taylor HS		Our students at Taylor need to be able to continue to choose from a variety of AP classes. Because of zoning areas Taylor may decrease in population more. If the students who are sent to Cinco Ranch that actually live near Taylor went to Taylor many people would be served! Please consider making this change which would benefit so many...even the gas money to bus kids to and from school.
Taylor High School		Have all students from McMeans and MPJH attend Taylor HS
McMeans Jr High - Taylor HS		Our family continues to get emails about the district rezoning more students from McMeans to Taylor, instead of going to Cinco, LUZ 66. If the district only takes this LUZ from Cinco, the number of McMeans' students going to Cinco drops dramatically. This is not fair to the small number of students going to Cinco from McMeans. If Taylor does truly need more students, then all of McMeans' students should be zoned to Taylor. Think about the small sliver of students that would go to Cinco from McMeans if LUZ 66 is rezoned to Taylor. If needed just make McMeans a true Taylor feed school. Keep the most students together. Thanks
Taylor High School / Nottingham Country Elementary	<p>1. I believe the district needs to address the declining population at Taylor High School. With a declining population, Taylor will find that the opportunities / programs available at the larger schools will not be accessible to them. Without the added programs, teachers may see the need to leave Taylor and move on to other schools that offer the extras. That would then affect the education that Taylor students would receive.</p> <p>2. I also see a need to increase the population at Nottingham Country Elementary. Over the last 10 years, this school has gone from overpopulated (with temporary buildings) to a low population.</p>	<p>1. As for Taylor, I think a simple solution would be to change the school boundaries by sending all McMeans Jr. students to Taylor. Splitting a school is sometimes necessary but can affect relationships that have been built over 8 years. Another solution could be to change school boundaries for West Memorial. However, my thoughts would be to include the entire school, not just part, because the district would end up in the same situation that McMeans currently is in.</p> <p>2. As for Nottingham Country Elementary, I would suggest moving the students north of Kingsland back to NCE from Pattison. That would increase the school's population and also allowing Pattison to be able to grow to the south if need be, thus relieving other elementary schools to the south.</p>

GROWTH

Taylor High School	We feel that Taylor reputation will be comprised, because of our falling enrollment numbers. The THS kids should have the same opportunity to learn as the newer school. We do not want programs to be taken away, and have learning comprised.	We could have all of McMeans feed into THS rather than having a THS/CHS split.
Taylor HS	Stop putting huge amounts of money in the administration buildings and in what would pass for a Jr. College football stadium. Put it in the teachers salary and student facilities.	Update the succession from the Jr. Highs to keep Taylor's student population from declining.
Taylor High School - Katy TX	<p>School needs to remain competitive by bringing in kids from McMeans into Taylor not splitting to Cinco</p> <p>For student success - Need a more detailed tutoring/mentoring program for kids that are not GT or PreAp for Math and English writing so they can succeed. Catch them early involve the teacher instead of making it the child's job. Set up a tutoring program just like they do for kids in elementary to help them where they have to meet for 6 weeks certain days times etc,</p>	
Taylor High School		There needs to be some rezoning implementations done to address the declining enrollment at Taylor High School. The areas between Highland Knolls and Westheimer Parkway should be rezoned to Taylor.
Cinco Ranch High School	I feel that letting the existing students stay in the same environment where they have begun to fit in, make friends and are members in certain school sports, clubs, and activities cause them to feel secure and will result in fewer behavioral issues and enhanced learning. I would ask first that we not be rezoned, second that if we are rezoned that existing students be allowed to finish at Cinco Ranch High School with parents providing transportation. Also, if I am forced to sell my home to keep my children at Cinco. My home will sell at a much lower cost than what I paid for it resulting in a degeneration of our neighborhoods.	

GROWTH

Seven Lakes High School	<p>1.Keep growth of enrollment at SLHS to a minimum by redistricting the high school boundaries until the new school opens.</p> <p>2.To limit the number of students going to each school this will help keep the learning environments smaller, which has been proven to enhance learning for the majority of students.</p> <p>3.By keeping enrollment to a minimum, it also keeps the HS a safer environment.</p>	<p>Redrawing the boundary lines for high schools now so that SLHS does not grow so large before the new hs is finished. Have there been projections for Cinco HS, Taylor, Katy, etc. to see what there enrollment will be in the years to come before the new high school is finished? It seems like it would be more efficient use of our facilities to "max" out each school before adding more "trailer units".</p>
Taylor High School		<p>Re-district to bring more kids in to Taylor High School. The easiest way would be to have BOTH junior highs (MPJH and McMeans) go to Taylor.</p>
Taylor High School	<p>Would recommend that the District consider redistricting and rezoning to for certain schools (ie Taylor) before considering a Bond to be passed!</p> <p>Taylor High School is one of the conerstone schools of KISD and as such it deserves more attention than what it has received! Before spending any more money on building all these mega highschools why not focus on the schools we have!!! Let's consider having all McMeans kids coming to Taylor! Why Not?</p>	<p>Rezoning and redistricting of areas to certain schools(ie Taylor Highschool)to address overpopulation in certain schools! Our enrollment is down and if something is not done to address it , it will continue to fall!</p>
Cinco Ranch HS/Seven Lakes HS	<p>Reduce crowding at Seven Lakes HS by moving boundaries.</p>	<p>Change boundaries for Cinco Ranch HS to include Bayou Crossing (Mason Rd/Piper Terrace). Currently zoned to Seven Lakes.</p>
SLHS, BDJH	<p>1. Too many students in both of these schools. Having 5 lunch periods at BDJH is ridiculous. Both of my children spend 20 minutes in class, break for lunch and then return back to that class for another 20 minutes. That is very disrupted to the learning process for that class...especaially on test days. The rezoning of WCJH was not done with logic.</p> <p>2. SLHS has too many students per classroom.</p>	<p>Rezoning to better balance each schools enrollment, stop letting the parents make the rezoning decisions. Too many emotions involved and not enough logic.</p> <p>However, I feel strongly that we need more schools. So a bond election is the best option.</p>

GROWTH

Taylor High School	Maintaining curriculum at all levels to support students interests and abilities. When enrollment dropped many teachers were reassigned to other schools. Some classes/programs were dropped and students lost choices in scheduling. Increasing the student population with all MMJH might be an option so that a high level of excellence can be maintained for the students at THS.	
Seven Lakes High	Technological advancements 3 Supports curriculum 2 Addresses district growth 1 enhances student growth & success 4	Put 6th grade in elementary schools and move 9th grade to middle schools. Utilize alternative high schools as regular high schools with alternative wings for students who need services.
Taylor HS	Renovations and equipment replacement to Taylor HS.	We need to adjust school zones to allow an enrollment balance amongst the existing high schools. This would save the Katy population money and allow us to utilize the great facilities already in place.
Taylor High School		rezone students from Mcmeans Jr. High to attend Taylor High School.
Garland McMeans Jr. High, Cinco Ranch High School		If rezoning is necessary, that is understandable, but please let the students that have already began their education in the high school level continue and have their siblings follow in there footsteps to the same high school. If transportation is an issue, the parents will have the responsibility to get the students to and from school.
OKE, Seven Lakes, WCJH	1. Supports curriculum, 2. Enhances student growth and success, 3. Ensures a safe and functional learning environment, 4. addresses district growth	Rezoning the whole district. Paying attention to feeder patterns and proximity to schools.
Taylor high School	Growth in School	Bring all of McMeans to Taylor

GROWTH

MPJH, NCE and Taylor HS		Rezoning to the older schools to "equalize" student populations. The Katy growth is primarily west, but the schools are close enough together that rezoning will not cause students to be on school buses for any significant amount of time. The district should treat the rezoning similarly to when they open a new high school with the freshmen and sophomores going to the "new" zoned school while seniors and juniors have the opportunity to stay at their original high school if they provide their own transportation. It does not make sense to build new schools and add t-shacks when there is plenty of space available in existing buildings.
Cinco Ranch and Taylor High Schools re-zoning	Children that are currently attending Cinco Ranch High School should be grand-fathered to be able to continue their entire high school attendance there. They should not have to split their attendance going to Taylor High School due to re-zoning.	Children that are currently attending Cinco Ranch High School should be grand-fathered to be able to continue their entire high school attendance there. They should not have to split their attendance going to Taylor High School due to re-zoning.
Seven Lakes HS		I have heard that Katy ISD may rezone CRHS students to KTHS and SLHS students to CRHS. Neither my family nor I want to be rezoned, period. Students currently in the school should be grandfathered with the option of choosing to be rezoned.
Cinco Ranch High School	I chose the subdivision I live in specifically so that my kids go to CRHS. Now I hear there is talk about rezoning our subdivision to Taylor, that is what I am strongly opposing.	
Seven Lakes	1. re-zone to less crowding	
SLHS, BJH or any school		Zoning should be done logically. Schools being the center of a radius at elementary- hope for more walkers/bike riders and cut down on need for buses. Feeding patterns into Jr High that then goes into a High School. Stop fragmenting several Jr Highs into multiple high schools. (That age is emotionally stressfull itself w/out having to go to a different HS than your group of friends. Fragmenting at elementary into Jr High could be an option).

GROWTH

<p>WoodCreek Elementary, WCJH, Seven Lakes High School</p>	<p>Each of the schools above are outstanding facilities and provide a very good educational environment for learning. However, the effectiveness of the facilities will be diminished if overcrowding occurs and is not remedied. My children attended Beckendorff Jr. High when all the portables were brought in and were fully utilized. Quite honestly, this was less than an ideal learning environment and not what I expected from the standards put forth to my family about Katy ISD. With proper planning, demographic reviews and management, I could not understand how this occurred. We lived near a community (in another state) where the growth rate was incredibly high. In that situation, the municipal government managed the growth (for infrastructure and schools) by controlling the building permits. It was understood that it was in the best interests of the overall population to manage the growth. Has this ever been considered?</p>	<p>As stated above, I thinking building should be better timed for dealing with growth. In addition, it would seem reasonable to look at each of the current facilities and see if they are being utilized at a reasonable level (i.e. zoning). I do try to understand the emotional, staffing, transportation, etc... issues associated with re-zoning. I feel some consideration should be given to communicating re-zoning with a reasonable time for families to make adjustments if they so choose.</p>
<p>Cinco Ranch High School</p>	<p>Cinco Ranch enrollment is stable and the students are very content. Do not move students from Cinco Ranch High School to Taylor High School just to boost the enrollment at Taylor High School. Seven Lakes has a population boom. Residents moving to this zone understand the enrollment needs. Moving students to Taylor from Cinco Ranch HS does not remedy any problems for the school with real growth problems which is Seven Lakes HS</p>	<p>Cinco Ranch is a big enough facility to take some relief off of Seven Lakes HS Some neighborhoods that are actually closer to Cinco than Seven Lakes should be rezoned to Cinco Ranch HS. No neighborhoods should ever be rezoned due to a drop in AP program enrollment. When rezoning is needed due to growth, All current students should be able to pick their school if they have already begun high school. Also, if their is one student in a family that has been grandfathered to stay at their current school, then siblings that will attend high school while an older sibling has taken the grandfather act should also be allowed to attend the same school thru graduation as long as the parents are willing to provide transportation.</p>
<p>Cimarron, West Memorial, Katy HS</p>		<p>Rezone the kids from Cimarron, West Memorial, Governor's Place to go to Cinco Ranch High School instead of Katy. There is no need for them to be driving so far to school when there is a school right around the corner.</p>
<p>Beck Jr. High and Seven Lakes High School</p>	<p>The schools (especially the high schools are too crowded. I don't believe the dividing of Jr. Highs between several high schools is productive for the students.</p>	<p>Timing is always too slow for the building of the new schools. Everything reaches overcrowding several years before the new schools are built.</p>

GROWTH

<p>Taylor and CRHS</p>	<p>I believe rezoning LUZ's for Taylor and CRHS is a big mistake for the short term correction. The population for the feeders for Taylor will be/are growing and KISD will find a mess in the coming years. The number of rooftops within Taylor and Cinco zones is stagnate. What you are seeing is a small population shift similar to what happened to Taylor a number of years ago when it's population was maxing out. Taylor families raised it's kids and are moving out, being replaced by younger families with younger kids. You will be seeing the same at Cinco in the coming years as the families graduate their kids and move out and are replaced by younger families. If you want to see the historical data of this process, take a look at what happened in the Fleetwood neighborhood area 20 years ago.</p>	<p>KIDS needs to be prepared to ride out the fluctuations in population shifts. By rezoning 'existing' or 'established' LUZ's, you create a unwelcome precedent. I think you will also see many of the kids that you wish to move to Taylor end up going to Cinco anyway as the parents will themselves move, get apartments with Cinco addresses, rent homes, etc.</p>
<p>Mayde Creek Elementary and Junior High</p>		<p>I'd like to see it slow down some or stay a bit more controlled. More people move here for the small town "Katy" feel and sense of community. It's the sense of being back in time where things had a slower pace and purpose, and people had time to help others and visit. There's a way to be as big as we have capacity for, yet be a smaller, more intimate community and civic oriented area. (See Cinco Ranch for too much growth, too fast, and too many small subdivisions within a development.) Katy and Katy ISD DOES NOT need to be a "carbon copy, cookie cutter" type of place like every other side of town and every other School District. We need to draw upon the things all ready here and in place, like what and who created this District in the first place and continue to tweak it to a different level.</p>

GROWTH

<p>All of them</p>	<p>Stop building schools until there are enough students living in an area to fill them up. What you do now is fraudulent.</p> <p>Go back and analyze how you've spent the 1.2 billion dollars that you've taken from the taxpayers and just look at the things you did with it that were wasteful. Learn from your many mistakes. Taxpayers would be grateful.</p>	<p>How about having the gumption to rezone? You all don't seem to know the difference between "zoning" and "rezoning." The District had "zoning" plans when I was on the board. What happened to those? Rezoning entails moving lines to accommodate more populations and fewer populations. The concept of having a neighborhood school went out the window many years ago when YOU stopped catering to that idea. You favor new areas over old. You favor your favorite builder over the true needs of children. You should be ashamed of yourselves for that. Self-serving actions will do you in eventually.</p>
<p>Taylor High School</p>	<p>1 - fully utilize existing facilities 2 - rezone students to enable full utilization of existing facilities</p>	<p>rezone students to enable full utilization of existing facilities</p>
<p>Stanley Elm, WoodCreek Jr.High, Seven Lakes High Schools</p>	<p>Stanley Elm, WoodCreek Jr.High, Seven Lakes High Schools</p>	<p>I do not like how the Katy School District redistributes the students.</p>
<p>SStanley Elm, WoodCreek Jr.High, Seven Lakes High Schools</p>		<p>create new zoning procedures</p>
<p>Memorial Parkway Elementary</p>	<p>I feel that all students should be given the right to learn inside the school facility instead of portable buildings. Something needs to be addressed at all school campuses with portable buildings.</p>	<p>I am sure that something creative could be done. I don't like the idea that my children are in portable buildings when we have bad weather days and live in hurricane mode 6 months out of a school year. Not to mention the security issue because they are located outside.</p>
<p>BDJH, WCJH, SLHS</p>		<p>I suggest that the district consider looking at the current attendance boundaries. Identify which campuses are under utilized and redistribute students accordingly. The evaluation of the attendance boundaries should be an ongoing effort if we are to maximize utilization of existing facilities and campuses while considering the cost constraints of the district. Communities must be aware that this process must be done on a regular basis and attendance to a specific campus is not permanent.</p>

GROWTH

Cinco Ranch High School/McMeans Jr High School		<p>Please do not force my child to switch schools or make my younger child go to a different school than his older brother.</p> <p>I have passed on two carrer moves to give my kids a stable high school experience. I cannot believe that it is necessary to make a rushed change to make up for lack of planning on the part of the district.</p>
Woodcreek Junior High	<p>1. Cinco SW needs another Junior High or re-zoning needs to be done. The newest sections are forced to drive 8-10 miles to Woodcreek when Beckendorff is 1-3 miles away. Woodcreek is getting full and Cinco SW is continuing to grow at very fast rate.</p>	<p>re-zone if necessary.</p>
Cinco Ranch High School	<p>1. Allow students who already attend a high school to stay at the same campus through 12th grade.</p>	<p>A ten year plan is a good idea. Make goals and strive for them to be fully implemented in 10 years. We need to have the best use for the campuses.</p>
Rezoning from Cinco Ranch High School to Taylor High School	<p>My main concern at this time, is the current rezoning proposal for residents of several of the Kelliwood subdivisions ,to be rezoned from Cinco Ranch High School to Taylor High School. No matter what conclusion is reached by the committee, it is very important that current students of Cinco Ranch High School be given the opportunity to stay there until graduation.</p>	<p>Plans for growth without the addition of new facilities, should be addressed and planned for in an appropriate manner. This should be done without interruption to students that are currently learning in a campus that falls under the issue of rezoning. Any future rezoning, should encompass students that are currently in middle school;not those who have already become involved in high school. Current Cinco Ranch students that have auditioned in the fine arts area , or those that have tried out for sports, and have been placed, should be grandfathered until graduation. Currently, Taylor does not offer some of the same opportunites as Cinco Ranch. An example of this would be the Bravo and Viva show choirs. We would be directly affected by this.Our nineth grade daughter is currently in one of the most advanced choirs at Cinco Ranch, and will most likely be admitted to one of the two show choirs. She is currently working weekly with the Cinco Ranch High School choir teacher, Mrs. Wilson, as well as a vocal coach that comes out to Cinco Ranch.The vocal coach also works with the Houston Grand Opera. Our daughter, possesses an operatic singing voice, and will need to continue to maintain this high level of instruction in order to be considered for any musical</p>

GROWTH

cinco ranch high and taylor high	1. please leave Kelliwood Gardens at Cinco Ranch High school to enhance our student's growth and success	Allow voluntary transfers of families that would like to go to Taylor. If Kelliwood Gardens is redistricted, please allow all siblings of current students to go to Cinco! We love Cinco!!!
CRHS and THS	I feel allowing the students to continue in the campus they are currently enrolled in is much more beneficial to the student's success, particularly those involved in school activities and sports.	If rezoning is necessary to address student population at schools, allow any student to finish at their current campus through graduation and younger siblings to follow in the same school with parent-provided transportation if necessary.
Beck Junior High and Seven Lakes High School		I agree that there needs to be something done long term to address the overcrowding at Seven Lakes but my concern is that I will have a senior at Seven Lakes and a freshmen at Cinco Ranch. I think it is of the utmost importance to "grandfather" siblings. The logistical nightmare of having children at two different high schools is hard to imagine. I also think very strongly that if re-zoning is going to take place for next school year, then it should only affect incoming freshman. All others should be left alone. You have freshman who have already made the dance team or a sports team for next year. How are you going to take that away from them? Please use common sense when making these decisions, realizing that you are dealing with families! Not just buildings and numbers! Thank you!
SEVEN LAKES		We do not think we should build a new school. Rezoning Cinco, Seven Lakes and possibly Taylor to help crowding.

GROWTH

<p>Seven Lakes High School, Beck Junior High, Taylor High School</p>	<p>1. If it's going to be under-utilized before a new high school can be opened in 2013 and a natural rezoning time occurs, use the Taylor campus for special programs and/or administrative overflow for the district. 9th Grade Centers are great, but if those kids can be moved onto the main campus and the center be used for something else, they'll be fine, just like they were for all the years before 9th Grade Centers, a sound academic idea but a bit of a luxury, existed.</p> <p>2. Provide temporary buildings and adequate staff at all levels for the campuses that will be large. The southwest area has dealt successfully with these conditions several times over the years and can do so again. Be supportive of those administrations. They're pretty amazing people!</p>	<p>1. Leave district attendance lines where they are for at least another year and if changes need to be made for 2010/2011, make them now. Give people a year to wrap their minds around the changes and adjust. That's usually all it takes. 8th Graders have a tough enough year and are already set for where they're going next year. Many of them already have t-shirts and plans! Why would you mess with them now? The district can't even come up with curriculum requirements that should already be printed and ready to hand out. Let's deal with that issue first. That also seriously affects our 8th graders, some of whom have taken an amazing foundations/health course that may count for nothing for them. It's also going to wreak havoc on the spring calendar as curriculum meetings have to be moved and rearranged. When the rezoning was done for the opening of Seven Lakes, many of us in the community expressed concern about Taylor's numbers and possible under-use of their facilities. The issue should have been addressed then, but we were obviously ignored. From what I've heard from the SLHS administration, they're set to handle the numbers. If Taylor becomes a 4A school and/or Cinco moves to District II, life will go on.</p> <p>2. Avoid, if at all possible, moving high school kids from an existing school to an existing school. It is a very difficult thing to do at the grade school</p>
<p>District Aquatics Center</p>	<p>Katy ISD needs to build a state-of-the-art aquatics center with a 50 meter pool and diving facility which can be used by Katy ISD schools and the the Katy community as a whole. Katy ISD aquatics programs do not currently have access to a facility which can host long-course meets or large short-course meets. A state-of-the-art aquatics facility which can host these types of competitions would be very beneficial to Katy ISD and the community.</p>	

GROWTH

Seven Lakes High School	Rezone students out of Seven Lakes beginning with the incoming freshmen of 2010. The school is extremely overcrowded while other facilities are not being used fully.	Rezone all of the students who attend McMeans Jr High to Taylor High beginning with the incoming 2010 freshmen. Rezone all of the students who attend Beck Jr High to Cinco Ranch High beginning with the incoming 2010 freshmen. Rezone all of the students at Wood Creek Jr High to Katy High School beginning with the freshmen of 2010. I feel it extremely unfair to expect a student to move from an existing school to an existing school. Therefore, I feel it appropriate to begin rezoning with the incoming freshmen of 2010. Families should not be forced to split between two high schools, therefore "grandfathering" should be allowed.
Taylor High School	All students at McMeans should go on to Taylor High School, instead of splitting McMeans students between Taylor and Cinco Ranch high schools. This will allow Taylor High School to remain competitive within the school district and help students make an easier transition to high school as they will know that all their friends from jr. high will be there in high school.	

New Facilities

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Seven Lakes High School and Future High School		Add another line and cashier in the existing facility. Incorporate 2 lunch lines into the design of the new high school.
Woodcreek Jr High		<p>2. When building new facilities, choose the sites more carefully. Building WCJH without the basic road infrastructure needed to handle the traffic has put a lot of stress on my child and our family. I will not allow her to ride the bus because I drive behind the buses everyday. Their wheels are not even on the road (hanging over the edge in the ditch) at Falcon Landing & Gaston Road. As a result, we drive our daughter to and from school everyday. I would much prefer she ride the bus but I do not feel like this is a safe option. As soon as the road infrastructure is available for buses to drive completely on the road, my daughter will ride the bus. The traffic is so bad on Gaston approaching Katy Flewellen that many cars are cutting through Grayson Lakes so their children are not late for school in the morning. I have contacted Fort Bend County several times and no one will respond. I would appreciate the school board expressing their concerns to Fort Bend County as well. They are more likely to listen to you than to me.</p>
Taylor High School	Consider building a natatorium for Katy ISD. Katy has the same passion for swimming as Conroe, Ft Bend and other districts who have recently built wonderful beautiful natatoriums, greatly enhancing their districts.	
Seven Lakes High School	Build a new school to reduce crowding at Seven Lakes or rezone to decrease population at Seven Lakes	

New Facilities

<p>Sports stadium, high schools</p>	<p>1. Great need for a second district sports stadium to relieve scheduling problems (no Thursday football, especially Homecoming) at Rhodes. Build a multipurpose stadium that can host district and regional sporting events in other sports, e.g. football, soccer, track and field, baseball, softball. The hosting benefits will give recognition to KISD; less travel time for KISD students will mean less classroom time missed; students traveling to support their teams will be safer since they do not have to drive a long distance (e.g. Deer Park); travel expenses for KISD students will be reduced, and visitors will spend money in our community.</p> <p>2. Make sure that any new facilities are served adequately by surrounding roads, and work closely with the counties to ensure rural roads are well-maintained and well lit for our student drivers.</p>	<p>1. Build 9th Grade Center at same time as the high school.</p>
<p>Seven Lakes</p>	<p>1. Provide the facilities needed for the kids to finish at the school in which they started in order to assist them with social, as well as, academic development.</p> <p>2. Provide facilities in a timely manner that will provide for a solid education without interfering with #1 above.</p>	

New Facilities

<p>new high school, new elementary and possibly new stadium, new bus facility</p>		<p>I live off of Spring Green and Katy Gaston and use Katy Gaston, Greenbusch and Katy Flewellen to get to my daughters school. These roads are horribly unsafe and are not designed to handle the capacity of traffic that will come when the elementary opens up in Pine Mill Ranch and the High School that is proposed at Spring Green and Katy Gaston. They are already extremely unsafe. They need shoulders with a curb and gutter at minimum if the right of way is too much of an issue to widen the roads outright. My daughters bus has already been run off the road into those steep ditches twice this year because there is no room for maneuverability. If Katy Gaston (is it Falcon Landing now?) cannot be widened to 4 lanes then the Spring Green extention to Katy Flewellen should be considered. Obviously the roads must be improved before the schools open up. If the football stadium ever comes to fruition it would magnify the issue. I'm making this comment as a resident in this area but also as an employee in planning with TxDOT so I'm basing it on my experience as well. Will there be a summary of the various comments you received or perhaps a results of the hearing summary? Thank you for the opportunity to provide input.</p>
<p>all</p>	<p>Indoor Olympic size natatorium with the following specifications:</p> <ol style="list-style-type: none"> 1. 50 meters x 25 meters of water 2. 25 yards x 25 meters of diving well 3. full sized score board 4. offices 5 upper level seating 6. 1 meter, 3 meter diving boards and platform 	
<p>SLHS</p>		<p>Instead of addressing the attendance growth of SLHS by building another high school for the south and southwest growth, keep these neighborhoods at SLHS and shift those neighborhoods north of the school back to Cinco and then some of those relocate to Taylor.</p>
<p>All that have had T-Shacks with their school for extended time.</p>		<p>Add additional permanent space to schools where there is growth, but does not warrant a new school being built.</p>

New Facilities

All	<p>1. Sustainable/Green Building, including high-efficiency, practices should be utilized in both new and retrofit school projects to improve the health, productivity, well-being and academic success of students, teachers and staff. The district would actually SAVE money by implementing such practices--through lower energy bills, lower absenteeism and lower insurance premiums. There are numerous other benefits as well. I'd love to provide some ideas and statistics.</p>	<p>Rather than the current cookie-cutter school design being used throughout the district--you know, the one in which the students receive no natural light in their classrooms--the district could adopt a more flexible model that would allow for growth. There are numerous options currently being used by businesses that provide workplace flexibility that would easily translate to the education sector.</p>
Beck Jr. High and Seven Lakes High School		<p>Timing is always too slow for the building of the new schools. Everything reaches overcrowding several years before the new schools are built.</p>
Mayde Creek Elementary and Junior High	<p>Build new Mayde Creek Elementary on land all ready acquired across and down street from current location. Take this land and existing MCJH and build brand new facility using existing plans (Cardiff and Woodcreek Blueprint).</p>	
all area high schools	<p>build a natatorium that could be shared by multiple high schools, host large district meets, and be used by the community at large. It would be better use of funds and provide more functionality than small pools that can only manage the specific high school team.</p>	<p>make sure that facilities are balanced and when possible are positioned to service both the short (10 year and less) and longer (20 year) plans for the district.</p>
For the entire district to use	<p>I would like to see the district build a 50 meter by 25 yard pool for the district to use along with the community, equivalent to Rhodes Stadium for football. Something that could host 500 swimmers/families or more. This would be a huge asset to Katy and would be put to use by not just our high school teams but the community's USS and summer league swim teams.</p>	
Facility for use by all HS Campuses	<p>A Long Course Meter Competitive Swimming Pool which would support all HS Swimming Programs. Similar to what Conroe ISD and Fort Bend ISD have built, to hold 500 plus people. This would allow the HS Programs to host dual as well as invitational meets.</p>	

New Facilities

<p>Seven Lakes High School, Beck Junior High, Taylor High School</p>	<p>3. Use the considerable resources you have in the community to help put together a strong bond proposal and then get out there and champion it for you. We need schools (especially a new high school), probably a bus barn on the south side, and whatever material needs we have, such as buses. Anything else is a luxury, I don't care how much it might help us look good in comparison to neighboring districts. When I talk to friends who checked us out on-line before moving here, they were interested in test scores and college acceptance rates, not how many stadiums we have or what kind of grass they have.</p>	
--	--	--

Existing Facilities

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Taylor High School	Taylor HS is in need of serious upgrades and remodeling. This high school is 30 years old and our students deserve the same learning environment as the newer schools. As a 15.5 year resident of the district and voting taxpayer, I find it offensive that children of new people moving in, who have yet to pay a dime in taxes, are benefiting from my hard earned money and my child goes to a school that needs repairs and updates to bathrooms and gyms and field house, etc.. the basics of facilities. This is a disgrace.	
James E Taylor High School	The school is in need of an update, but that is not my primary concern at this point.	
Taylor high school	<p>Improvements desperately need to be made in the pool. This area of the school is outdated. Studies show that students active in sports and the art do better. I know that KISD is well aware of this and generally does a good job of supporting these groups.</p> <p>We also need to look at reallocating student enrollment. One school should not be overflowing while another is underutilized. If you move to an rapidly growing area you should be aware that school changes may occur. One way to do this would be to shift all the students that go to MMJH so that they all attend THS. That could allow for changes at Cinco and Seven lakes.</p>	
Taylor HS	My concern is that Taylor, being one of the oldest HS in the district, needs the outdated facilities overall to stay competitive with the newly built HS of recent years. Taylor and its students have been a large part of KISD and have been a great contributor to its academic and community success. This deserves continuation.	Improved facilities in the areas of sciences and engineering, tow growth fields of the 21st century.
James E. Taylor	3. Updating and maintaining the physical safety and educational/technological environment at Taylor to ensure that the teaching atmosphere for the children and teachers are on track with the rest of the district schools. This is a minimal requirement for our district wide facilities before we talk about building new facilities.	

Existing Facilities

Taylor High school	continue to maintain facility	
MPJH and THS	MPJH 2. Improve covered walkways to portables. 3. Fence for safety along Westgreen. 4. Outdoor basketball court.	
Taylor High School	2. Improvement to Tennis Facilities (covered bleachers, water fountains, redo locker room, media room)	
Taylor High School	Physical improvements to building integrity Why not update the existing facilities and redesign the boundaries, instead of adding and adding to the new facilities? 2. Update and Maintain in and around the swimming pool at Taylor. We love our pool at Taylor..but the district must know we need a new timing board and desperate need of new diving blocks. 3. Get rid of ALL rusted out lockers in the athletic locker rooms (can't tell you how many clothes my children have had ruined with rust stains)	1. redesign the school boundaries located around Taylor. I find it really confusing on why Lakes of Buckingham and Highland trails would go to Cinco Ranch High School!
All locations	We need to keep our facilities and grounds looking the best year round. I have noticed unkept lawns and grounds during the summer months. KISD must be a good neighbor. Property owners in the surrounding neighborhoods have to maintain their properties at all times.	
R. Alexander, Beckendorff & SLHS		* Improving the existing facilities/expansion of schools footprints to bring more classrooms inside/reduce the # of portables
Alexander Elementary	Our third, fourth and fifth graders are out in portable buildings. None of these have bathrooms or sinks, so our children are walking outside to get into the main building.	We went to school in Louisiana with portables as well. However, they were attached to the main building's halls. You didn't know when you were inside the main building or outside in a portable it was flawlessly attached and beautiful.
Taylor High School		Taking care of the facilities we already have to the point that would interest new families to want to enroll in Taylor High school.

Existing Facilities

<p>Seven Lakes High School and feeder schools</p>	<p>I think having a ninth grade center at one end of a super long building is a serious design flaw. A 9th grade center should be in the center of the building so all the NEW incoming freshman can get to all classes in a timely manner and not be stressed out about one more thing. They can almost never go to their lockers, especially if they are in sports and have to change and try to get alllllll the way back down to the other end of the school for class. I hope this building model is not used in future schools.</p> <p>I think it would be a great idea if you took the time to spend a day there as a 9th grader, and run the schedule and see the class numbers for yourself and see if it's an environment that you could thrive in. My child has to run to opposite ends of the school twice in a day and change clothes both times. It's a wonder she has any energy left over to do homework when she gets home.</p>	<p>If new schools are built, they should make more sense in the way the students will actually be using them. The 9th grade center should be in the center, so these brand new kids to the building can get to all parts in a timely fashion and have one less thing to worry about as they learn the ropes in high school.</p> <p>Of course my preference for buildings would be smaller, with fewer students. I know that is not cost effective and is why we have this huge high school. If we are going to cont. on this path of giant schools, then you must work on design to make them more functional for ALL children to learn and not get lost in the shuffle.</p>
<p>Rylander Elementary</p>	<p>1. Improved parking plan - This school is seriously lacking in adequate parking to serve the teachers and families. As construction of the new bus facility and through construction of Falcon Landing are completed, the current street parking and car pickup lines will be extremely dangerous. Additionally, due to the placement of the school, the area streets limit parking and the school is forced to reduce programs that families could attend. The addition of more parking will alleviate program restrictions.</p>	<p>Rezone facilities. Add an additional crossing guard on Westheimer Parkway. Perform a study and inform parents of where they can legally and safely park for events when parking is full.</p>
<p>Seven Lakes High School</p>	<p>Wear and tear on facility if crowding occurs</p>	
<p>James E. Taylor High School</p>	<p>4.Supports curriculum - Again, rezoning will help THS remain a High curriculum school that help put our district on the map. I bought my home in the THS district strictly based on past student curriculum and success. I would like it to stay that way.</p>	
<p>James E. Taylor H. S.</p>	<p>3)physical upgrades to original building to provide an attractiveness that will compete with Cinco H.S. and Seven Lakes H.S. and encourage more relocating families to send students to THS</p>	

Existing Facilities

All that have had T-Shacks with their school for extended time.	1 - Add physical classrooms, bathrooms, hallways, etc.. on to the current schools that have had T-Shacks on their campus for over 5 years. 2 - Build schools where the district and community feel it is appropriate to meet the needs of the district's growing population.	1 - Reference suggestion #1 from the previous question. T-Shacks only add classrooms and are suppose to temporary. If they are attached to a school for over 5 years then they are not temporary.
Cimarron Elementary, WoodCreek Junior High, Katy High School	Cimarron Elementary--New bathrooms/sinks in open area, walls in open area	
West Memorial Elementary	1)Build a wing so that a whole grade level does not have to be in portables.	Adjusting boundaries and making sure all facilities are carrying their share and are not overburdened.
Katy High School	The ninth grade campus should have more space in their office area, for both students and for parents, and a parent should know exactly where to go to either pick up a 9th grader, or to speak to someone, such as a counselor, an attendance clerk, a nurse, or a secretary. The office space is very small, and one is not sure which way to turn (left or right) when entering the building. I have not been sure on two occasions. I would appreciate a more clear direction on which room to go to. I am sure that an update on the size and/or appeal of the space would greatly benefit both the students and the parents at Katy High School.	
khs	ninth grade center is old and needs to be updated	rezone to relieve overcrowding at cinco and seven lakes; move students to katy and taylor.
Need to build the 7th high school so there is not overcrowding		We need new facilities. The high schools are too large. They are the size of small colleges. In addition, Rylander needs to have the preschool and Life Skills classes moved to an elementary that has lower enrollment.
Taylor HS	Update the HS interior bldg lockers, walls and bathrooms. There is no reason that I should pay KISD taxes to build new HS when we have the best one in the district aging.	

Existing Facilities

Creech	Creech needs a covered area to drop off / pick up kids at the school.	
Nottingham Country Elementary	<ol style="list-style-type: none"> 1. Rooms are not up to par with all the other elementary schools in space, useful/functional storage, and appearance in general. 2. Lightning in the classrooms is terrible. 3. Heating/a/c system is below par. 4. Carpet/painting needs to be done. 	Retrofit the older elementary schools and re-zone to use all the present schools.
All	<ol style="list-style-type: none"> 1. Sustainable/Green Building, including high-efficiency, practices should be utilized in both new and retrofit school projects to improve the health, productivity, well-being and academic success of students, teachers and staff. The district would actually SAVE money by implementing such practices--through lower energy bills, lower absenteeism and lower insurance premiums. There are numerous other benefits as well. I'd love to provide some ideas and statistics. 	Rather than the current cookie-cutter school design being used throughout the district--you know, the one in which the students receive no natural light in their classrooms--the district could adopt a more flexible model that would allow for growth. There are numerous options currently being used by businesses that provide workplace flexibility that would easily translate to the education sector.
Taylor HS	Renovations and equipment replacement to Taylor HS.	We need to adjust school zones to allow an enrollment balance amongst the existing high schools. This would save the Katy population money and allow us to utilize the great facilities already in place.
Taylor high School		Bring all of McMeans to Taylor

Existing Facilities

<p>MPJH, NCE and Taylor HS</p>	<p>The older schools in the district should be brought up to the standards of the newer schools from a technological aspect as well as a student opportunity aspect. Most if not all of the new schools are equipped with Smart boards in at least all math and science classes, where schools like MPJH and NCE have few boards that were mostly purchased by the PTA. Our students are very technologically advanced as a whole. If school is not utilizing the available technology then the students are bored and are not being taught the way their brains process information.</p> <p>Student activities like athletics and other extracurricular activities should be on par among the newer and older schools. This would include providing similar facilities (such as an outside basketball hardtop at MPJH)at the older schools as are being built at the newer schools. This would also include rezoning so that similar amounts of students attend both new schools and older schools. We are all very much aware that schools lose personnel (student teacher ratios suffer resulting in fewer educational opporunities) as well as specials teachers (student opportunities)once the population decreases to a certain point. School attendance zones need to be rezoned</p>	
<p>SLHS, BJH or any school</p>		<p>I also thought a suggestion of builing school capacity bigger than creating so many schools a good idea- sounded less costly. You already get portables placed about a year after the school is built- how much does that cost?</p>

Existing Facilities

<p>WoodCreek Elementary, WCJH, Seven Lakes High School</p>		<p>As an aside, I would have liked to have seen historical information in the online presentation as to the previous 10 yr. plans and how accurate the projections were relative to actual. If the current plan was to take the district through 2016 and yet it appears we are in need of schools in a number of critical locations, it would be helpful to understand what changed, how could better, faster, more accurate information be utilized for the next planning cycle. We have been here four years and I do not understand how the district plans and updates along the way. I would have thought a bond would have been put forth already. In addition, I believe straight-forward information needs to be communicated (and communicated again...and again) to the community at large so it's "crystal clear" what's needed and why. In addition, parents need to take an active role in furthering the positive needs and actions of the district -- 'prop 'em up and send 'em out' with factual information.</p>
<p>Cimarron, West Memorial, Katy HS</p>	<p>Cimarron Elementary is the same building as Nottingham, yet Nottingham does not have to use portable buildings. There has been a short in the cafeteria at Cimarron for years, and it has yet to be fixed. The newer elementary are getting a bunch of upgrades, yet the older ones are suffering. The gifted and talented children who go into West Memorial are not receiving the same services as the ones who go to Beck or Beckendorff or again a newer junior high. Yes, it is small, but each student in the program should have the opportunity to receive the same services regardless of where they live in the district. And finally, why is it that children from Cimarron, West Memorial, and Governor's Place have to drive 6 miles to get to high school (on very busy roads/interstate) when there is a high school 1.5 miles away. I think it is time to rezone.</p>	
<p>Mayde Creek Elementary and Junior High</p>	<p>Build new Mayde Creek Elementary on land all ready acquired across and down street from current location. Take this land and existing MCJH and build brand new facility using existing plans (Cardiff and Woodcreek Blueprint).</p>	

Existing Facilities

All of them	<p>Stop building schools that place kindergarten and first grade classes so far away from the main office. Little kids shouldn't have to traipse all over the school to get to core facilities.</p> <p>Stop building schools that look like shopping malls. That was a bad architectural concept when you first did it, and it's still a bad idea. You waste space, materials, and money.</p> <p>Secure schools by building them so that there is an exterior way to cover exits from a building. Your buildings are not safe. They are not monitored at night when cleaning crews are there, and people can walk in and out without anyone stopping them. That's been the case for decades.</p>	
Taylor High School	<p>1 - fully utilize existing facilities</p> <p>2 - rezone students to enable full utilization of existing facilities</p>	rezone students to enable full utilization of existing facilities
all area high schools		make sure that facilities are balanced and when possible are positioned to service both the short (10 year and less) and longer (20 year) plans for the district.
Memorial Parkway Elementary	I feel that all students should be given the right to learn inside the school facility instead of portable buildings. Something needs to be addressed at all school campuses with portable buildings.	I am sure that something creative could be done. I don't like the idea that my children are in portable buildings when we have bad weather days and live in hurricane mode 6 months out of a school year. Not to mention the security issue because they are located outside.

Curriculum

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Taylor HS	<p>Supports curriculum: I am worried that the curriculum at THS will be limited at its current population levels. Especially in the advanced classes</p> <p>Supports student programs: Limited population does not support new and improved programs that you are seeing at schools with larger populations</p>	
Taylor High School	Taylor is losing students to overpopulated new schools. We need to increase our enrollment in order to avoid loss of funds for programs such as AP and FFA programs.	
Taylor HS		Improved facilities in the areas of sciences and engineering, tow growth fields of the 21st century.
Schmalz Elementary	Dedicated computer labs WITH computer instructors. If students are going to be ready for the technology of the future, computer teachers are just as essential as art and music teachers, if not more so.	
		a sixth grade campus would be very beneficial. Numerous other districts (Humble ISD and the Woodlands, Conroe ISD as well as Lamar ISD) implement these measures.Our sixth grade classes are entirely too large.
Taylor High School	All my concerns can be met by ensuring adequate number of teachers and latest technology to support facilitation and learning.	
Taylor HS		Offer classes specific only to Taylor HS that would attract outside resources and students
RAE and BDJH	<p>Supports Curriculum: Money set aside for teacher training, teacher support when new instructional modules are implemented, instructional coaching/teaching models on a campus level, new teacher academies held year round, teacher to teacher mentoring, and elementary/junior high collaboration</p> <p>Technological advancement: return ITF position to campus level (21st century literacy must be instituted, but teachers need more support than what is given presently)</p>	

Curriculum

Seven Lakes High School (but pertains to all junior high and high school campuses)	There is a gap between Pre-AP/AP courses and academic courses. Students in Pre-AP courses are expected to do a great deal of their learning on their own. Classes are fast paced with lots of homework. Academic classes, however, move at a much slower rate. Students who struggle in Pre-AP classes and move down to academic classes find them far too easy, too slow and have little to no homework. There must be a way to address the needs of good students who do not thrive in the Pre-AP environment.	
Seven Lakes High School	1. A school district of KISD's caliber with Advanced Placement language programs should have a dedicated language lab with software and earphones and microphones to support listening and speaking exercises. All language classes should rotate at least twice a month through this lab to give students practice both hearing other speakers and speaking themselves.	
Seven Lakes High School	Access to technology if crowding occurs	
James E. Taylor H. S.	2) support student programs, especially music and athletic activities	
feeder elementary & junior high schools for Cinco Ranch High School		Need to stop erecting exorbitant buildings and invest the money in a well-rounded curriculum; it seems the elementary schools are limiting the phys ed and arts curriculum. The kids are spending 50% of their waking hours at school, and physical fitness needs to be a priority. Additionally, because not all kids are destined to be pure academics, the school curriculum needs to give them early exposure to the arts and alternative skills to eliminate the failure psyche that develops in CR's highly competitive academic program.

Curriculum

Cinco Ranch HS and McMeans JH	<p>Increased use of technology to support learning.</p> <p>Increased use of technology to provide a secure school campus</p>	<p>The only real answer here would be to expand existing facilities to accommodate growth if new facilities are not a possibility. I understand that there is a push to rezone school zones. I totally oppose this because (1) I picked the area I wanted to live based on the school zone and I do not want YOU to change that for me. Second, it is NOT in the best interests of the kids to abruptly change their school environment, particularly in the Junior High and High School years. My particular situation is the Taylor rezoning push that some Taylor parents are pushing DO NOT do this. I did not choose for my kids to go to Taylor and YOU do not have the right to make this for me.</p>
West Memorial Elementary and Taylor High School		<ol style="list-style-type: none"> 1. Ensure we have adequate and trained staff to accommodate the student teacher ratio needed. 3. Ensure that there is adequate facilities and staffing of special education teachers to accommodate special needs children.
cinco ranch Jr and Sr.	<p>In support of the Science and Technology initiatives we should have facilities for building (Shop and tools)and supporting F.I.R.S.T. Robotics teams around the district.</p>	

Curriculum

WoodCreek Elementary, WCJH, Seven Lakes High School	Each of the schools above are outstanding facilities and provide a very good educational environment for learning. However, the effectiveness of the facilities will be diminished if overcrowding occurs and is not remedied. My children attended Beckendorff Jr. High when all the portables were brought in and were fully utilized. Quite honestly, this was less than an ideal learning environment and not what I expected from the standards put forth to my family about Katy ISD. With proper planning, demographic reviews and management, I could not understand how this occurred. We lived near a community (in another state) where the growth rate was incredibly high. In that situation, the municipal government managed the growth (for infrastructure and schools) by controlling the building permits. It was understood that it was in the best interests of the overall population to manage the growth. Has this ever been considered?	As stated above, I thinking building should be better timed for dealing with growth. In addition, it would seem reasonable to look at each of the current facilities and see if they are being utilized at a reasonable level (i.e. zoning). I do try to understand the emotional, staffing, transportation, etc... issues associated with re-zoning. I feel some consideration should be given to communicating re-zoning with a reasonable time for families to make adjustments if they so choose.
All of them	If you didn't have such a fuzzy curriculum, you wouldn't need for the "building" to support it. Just leave your teachers alone in their own classroom, sit back, and watch the excellence occur!	Don't try to pawn off your United Nations school on the need for accommodating growth. This school will CAUSE problems because eventually no one will want to go there. Then you will be having to buy more buses to take the children from the east end to a regular school.
Middle and High School	School Tutoring, Second Language education ex. signlanguage, spanish, chinese	

Technology

Campus/facility	Suggested facility improvements
Morton Ranch Junior High	1. An addition of another computer lab 2. A minimum of 2 student computers in classrooms to use for quick research, typing papers, printing information for projects, etc.
Schmalz Elementary	Dedicated computer labs WITH computer instructors. If students are going to be ready for the technology of the future, computer teachers are just as essential as art and music teachers, if not more so.
Taylor High School	1. Continued expansion of Smart boards 4. More use in classroom of digital learner instantaneous electronic checking of concept understanding
Taylor High School	All my concerns can be met by ensuring adequate number of teachers and latest technology to support facilitation and learning.
Seven Lakes High School	Access to technology if crowding occurs
Cinco Ranch HS and McMeans JH	Increased use of technology to support learning. Increased use of technology to provide a secure school campus
West Memorial Elementary	Updated computers and TV's that work and display a proper picture. Special education staff expansion so that the needs of all special ed kids can be met. Due to the high mobility - what programs can be placed so ensure all children are getting a fair education. Smartboards - so all teachers who are interested can utilize the boards in bring more technology into the rooms. Support staff - comp ed - we are a campus who has more needs and don't have the staff to meet the needs of all the kids who need pull out programs. Kids who failed the TAKS in a previous grade or a benchmark don't get the extra support because there aren't enough comp ed teachers to do this.
Taylor High School	Campus technology Campus size to maintain support & administrative personnel Athletic facilities improvements
All of them	Stop putting high definition televisions in every room that you can. They're an excess and not needed. Stop falling for every technological advancement that comes down the pike. You are chumps for tech salesmen because you don't know anything about technology. Wait until you know for sure that something better isn't coming out next year. Recall your own statements about how technology has a half life of three years. Students don't need the latest technology because it will be outdated long before they even graduate from high school! I watched you buy "smart boards" for \$100 a pop and they were free before you ever had them delivered! What students need is to know how to type, to know how to do basic matters with a standard computer, and how to read. Start with really teaching them how to read!

Technology

Seven Lakes High School, Beck Junior High, Taylor High School	Less emphasis on Mr. Stocks wanting smart boards at Beck and more on paying attention to who their students are and how teachers interact with them would go a long way towards helping our kids be excited about learning. It's not a good thing when you're turning the GT kids off, especially in math and science.

Operations/Support Services

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Seven Lakes High School and Future High School	The 9th grade cafeteria need 2 lunch lines, but currently only has one. The children are delayed in getting their lunch, and cannot finish eating.	Add another line and cashier in the existing facility. Incorporate 2 lunch lines into the design of the new high school.
Woodcreek Jr High		2. When building new facilities, choose the sites more carefully. Building WCJH without the basic road infrastructure needed to handle the traffic has put a lot of stress on my child and our family. I will not allow her to ride the bus because I drive behind the buses everyday. Their wheels are not even on the road (hanging over the edge in the ditch) at Falcon Landing & Gaston Road. As a result, we drive our daughter to and from school everyday. I would much prefer she ride the bus but I do not feel like this is a safe option. As soon as the road infrastructure is availalbe for buses to drive completely on the road, my daughter will ride the bus. The traffic is so bad on Gaston approaching Katy Flewellen that many cars are cutting through Grayson Lakes so their children are not late for school in the morning. I have contacted Fort Bend County several times and no one will respond. I would appreciate the school board expressing their concerns to Fort Bend County as well. They are more likely to listen to you than to me.
All locations		Hire good teachers and staff. Keep the salaries and wages competitive.
RAE and BDJH	Supports Curriculum: Money set aside for teacher training, teacher support when new instructional modules are implemented, instructional coaching/teaching models on a campus level, new teacher academies held year round, teacher to teacher mentoring, and elementary/junior high collaboration Technological advancement: return ITF position to campus level (21st century literacy must be instituted, but teachers need more support than what is given presently)	
Seven Lakes High School	4. Staff availability if crowding occurs 5. Staff stress if crowding occurs 7. Scheduling of events of crowding occurs	

Operations/Support Services

future	1. Secure open bidding from a minimum of 3 builders. Make bid public before they are awarded.	Be observant of when growth will peak, and enrollment will decrease.
James E. Taylor H. S.	1)enhance student growth and success through continued recruitment and pay of high quality teachers and coaches	
All, especially elementary schools	<p>1. Need many more special education teachers and assistants. The special education population is increasing, especially in elementary schools, and the need for inclusive classroom teachers is growing. The teachers at my elementary school are doing the best they can, but there just aren't enough teachers for the amount of students the have to serve.</p> <p>2. Need more autism training for all teachers. The autism population is increasing in schools, and many teachers are not aware of the unique needs these students have.</p>	
Cinco Ranch HS and McMeans JH	Increased use of technology to provide a secure school campus	
West Memorial Elementary and Taylor High School		<p>1. Ensure we have adequate and trained staff to accomodate the student teacher ratio needed.</p> <p>3. Ensure that there is adequate facilities and staffing of special education teachers to accomodate special needs children.</p>
SLHS, BJH or any school	Keep high quality teachers as the standard, don't just fill the slots.	

Operations/Support Services

<p>All of them</p>	<p>Stop using Ms. Guzman for your demographic needs. Anyone who can only claim a 9% accuracy rate is worthless. Get a crystal ball instead. Your in-house employee probably knows more than she does.</p> <p>If you didn't have such a fuzzy curriculum, you wouldn't need for the "building" to support it. Just leave your teachers alone in their own classroom, sit back, and watch the excellence occur!</p> <p>Stop building schools until there are enough students living in an area to fill them up. What you do now is fraudulent.</p> <p>Go back and analyze how you've spent the 1.2 billion dollars that you've taken from the taxpayers and just look at the things you did with it that were wasteful. Learn from your many mistakes. Taxpayers would be grateful.</p>	
<p>Memorial Parkway Elementary</p>	<p>I feel that all students should be given the right to learn inside the school facility instead of portable buildings. Something needs to be addressed at all school campuses with portable buildings.</p>	<p>I am sure that something creative could be done. I don't like the idea that my children are in portable buildings when we have bad weather days and live in hurricane mode 6 months out of a school year. Not to mention the security issue because they are located outside.</p>
<p>Seven Lakes High School, Beck Junior High, Taylor High School</p>	<p>2. Provide temporary buildings and adequate staff at all levels for the campuses that will be large. The southwest area has dealt successfully with these conditions several times over the years and can do so again. Be supportive of those administrations. They're pretty amazing people!</p>	

Student Support

Campus/facility	Suggested facility improvements	Suggestions for addressing growth
Woodcreek Jr High	<p>1. Lockers for new schools should have the ability to change the locker combinations each year. My daughter's locker was broken into by the student who had her locker last year! This was a stressful situation for her and she missed class time dealing with the situation.</p> <p>2. PE Lockers are broken into regularly. How can the kids focus on learning when they don't know if their things will be stolen. The solution by the PE staff was to forbid any purses or bags of any type. How are these young ladies supposed to bring personal hygiene items when needed without a bag or purse?</p>	
Taylor High School	3. More tutoring opportunities	
Taylor High School	All my concerns can be met by ensuring adequate number of teachers and latest technology to support facilitation and learning.	
sundown elementary school	support student programs,after school programs, retraining teachers especialy for pediatric psychology to better handle different types and multicultural background of students. Multicultural orientation is a plus.	<p>More retraining of teachers in elementary for pediatric psychology or having them being oriented on psychology 101 for age level of students being handled will make a great impact on students learning and be more effective in dealing with different types of students behaviour and having the knowledge of their student's cultural backgrounds will be of great assistance in tailor fitting their teaching styles. Having creative ways of teaching suites diff types of students. More exposure or orientation on different types of cultures of students being handled will help them being more effective..Being aware that different cultures and background of students being handled will enhance and make a great impact on their strategies how to teach better on a multicultural level. Tailor fit curriculum or a fresh and creative, innovative teaching designs and styles that is aimed for realistic goals set for each cultural backgrounds for the majority of students population being catered.</p>

Student Support

<p>R. Alexander, Beckendorff & SLHS</p>		<p>* making sure all older schools have the same technology, resources and services that the newer schools start off with</p>
<p>Seven Lakes High School and feeder schools</p>	<p>I think having a ninth grade center at one end of a super long building is a serious design flaw. A 9th grade center should be in the center of the building so all the NEW incoming freshman can get to all classes in a timely manner and not be stressed out about one more thing. They can almost never go to their lockers, especially if they are in sports and have to change and try to get alllllll the way back down to the other end of the school for class. I hope this building model is not used in future schools.</p> <p>I think it would be a great idea if you took the time to spend a day there as a 9th grader, and run the schedule and see the class numbers for yourself and see if it's an environment that you could thrive in. My child has to run to opposite ends of the school twice in a day and change clothes both times. It's a wonder she has any energy left over to do homework when she gets home.</p>	
<p>Sports stadium, high schools</p>		<p>Expand and enlarge (office and staff) the Partners in Education programs to allow more community and volunteer support in the schools.</p>
<p>Seven Lakes High School</p>	<p>Competitiveness/Fairness to sports/fine arts teams/tryouts/events if crowding occurs</p>	
<p>Cinco Ranch</p>	<p>My appeal is more to do with the softer side, than the bricks and mortar. More helping teachers in classroom. This will address the need for students that are not in the normal to upper level of academics. This will aide in their personal success, confidence, and growth.</p>	

Student Support

<p>West Memorial Elementary and Taylor High School</p>		<p>2. Ensure teachers and support staff have some form of diversity training given that our growing Katy Population is a diverse group of people from different cultures as well as different job backgrounds.</p> <p>3. Ensure that there is adequate facilities and staffing of special education teachers to accomodate special needs children.</p>
<p>West Memorial Elementary</p>	<p>Updated computers and TV's that work and display a proper picture. Special education staff expansion so that the needs of all special ed kids can be meet. Due to the high mobility - what programs can be placed so ensure all children are getting a fair education. Smartboards - so all teachers who are interested can utilize the boards in bring more technology into the rooms. Support staff - comp ed - we are a campus who has more needs and don't have the staff to meet the needs of all the kids who need pull out programs. Kids who failed the TAKS in a previous grade or a benchmark don't get the extra support because there aren't enough comp ed teachers to do this.</p>	
<p>Need to build the 7th high school so there is not overcrowding</p>		<p>We need new facilities. The high schools are too large. They are the size of small colleges. In addition, Rylander needs to have the preschool and Life Skills classes moved to an elementary that has lower enrollment.</p>
<p>SLHS, BJH or any school</p>	<p>counselor to student ratio kept adequate to allow actual contact time. Perhaps a counselor to handle emotional issues and one for scheduling issues. More coueslor and/or teacher input for best classes needed on individual student basis.</p>	

Other

Campus/ facility	Suggested facility improvements	Suggestions for addressing growth
seven lakes high school		Manage housing sprawl in this region til schools catch up. Make builders go elsewhere or be responsible for building schools first then housing.
		Convert Public schools to private sector schools. If you can afford private school then you get to go if you can't you don't. To bad lifes not fair. Get over it. I know at first this sounds rediculous but we are talking about long term correct. The purpose of schools was to teach people to know how to vote. Its proven illegals can vote in our country therefore the need is nolonger there to provide education to vote. Yes you will read this entry and go laughing down the hall. But the last laugh will not be anyones. Sorry, change is hard.
Taylor HS	Stop putting hugh amounts of money in the administration buildings and in what would pass for a Jr. College football stadium. Put it in the teachers salary and student facilities.	Update the succession from the Jr. Highs to keep Taylor's student population from declining.
