

# GET TO KNOW OTHERS KAP WORLD GEO

## WHAT IS KAP WORLD GEOGRAPHY?

World Geography is the study of the human and physical elements of the world. KAP World Geography is quicker-paced, more in-depth, and requires more time outside of the classroom than an Academic World Geography class.

## WHAT ARE THE EXPECTATIONS FOR SUCCESS?

Students are expected to complete weekly textbook readings and notes, create maps and complete assignments that cover various topics with the region that is being studied. Students will need to be able to manage their time efficiently.

## HOW ARE STUDENTS ASSESSED?

Quizzes assess knowledge of the physical and political locations of different regions as well as textbook readings. Information from both the textbook and in-class notes and activities are assessed on tests.
