OVERVIEW

The Architectural Design program provides students with the knowledge and skills needed to enter a career in architecture. Students will learn design history, techniques, and tools related to the production of drawings, renderings and scaled models for commercial or residential architectural purposes.

AVAILABLE INDUSTRY CERTIFICATIONS

Students have the opportunity to earn Industry Based Certifications. These certifications help students stand out in interviews, help students gain confidence in a subject area, and give students valuable experience in preparing for the level of rigor required for industry certification exams they may face in the future.

Autodesk Certified User AutoCAD
Students who enroll in Architectural Design I have the opportunity to earn this certification.

Autodesk Certified User Revit Architecture
Students who enroll in Architectural Design II on the high school campuses and at Miller Career and Technology Center have the opportunity to earn this certification.
