

# OVERVIEW

The Automotive program teaches students the principles of diagnosing and servicing major automotive systems. Students gain hands-on experience in the repair and maintenance of various vehicle systems and have the opportunity to earn several industry certifications. Students run the Garage at Miller Career and Technology Center where they gain real-world experience running an automotive shop.

## AVAILABLE INDUSTRY CERTIFICATIONS

Students have the opportunity to earn Industry Based Certifications. These certifications help students stand out in interviews, help students gain confidence in a subject area, and give students valuable experience in preparing for the level of rigor required for industry certification exams they may face in the future.
