

OVERVIEW

The Commercial Photography program provides students with the knowledge and skills needed to enter a career in the photography industry. Students will learn how to create images to promote or sell products or services. Students will develop the knowledge and skills necessary to analyze customer needs and preferences, apply the principles of art to photographs, and develop photographs using a variety of production techniques and processes.

AVAILABLE INDUSTRY CERTIFICATIONS

Students have the opportunity to earn Industry Based Certifications. These certifications help students stand out in interviews, help students gain confidence in a subject area, and give students valuable experience in preparing for the level of rigor required for industry certification exams they may face in the future.

Adobe Certified Professional Photoshop

Students who enroll in Commercial Photography II have the opportunity to earn this certification.

OVERVIEW

The Animation program provides students with the knowledge and skills needed to enter a career in 2D animation, 3D animation, video game design, film, and special effects. Students will develop technical and creative skills in industry-standard software while developing their visual design, storyboarding and sound design. The skills gained will allow students to create their own 2D, 3D, and stop-motion animation.
