

# OVERVIEW

The Construction Management program provides students with the knowledge and skills needed to enter a career in the construction trades. Students will learn how to read and use blueprints, carpentry skills, residential wiring and electrical skills, residential plumbing, and construction cost estimating.

## AVAILABLE INDUSTRY CERTIFICATIONS

Students have the opportunity to earn Industry Based Certifications. These certifications help students stand out in interviews, help students gain confidence in a subject area, and give students valuable experience in preparing for the level of rigor required for industry certification exams they may face in the future.
