OVERVIEW

The Networking Systems program prepares students for careers in Information Technology. Students learn to design, implement, and improve computer and information networks, gaining skills in analyzing data processing issues to enhance system performance.

AVAILABLE INDUSTRY CERTIFICATIONS

Students have the opportunity to earn Industry Based Certifications. These certifications help students stand out in interviews, help students gain confidence in a subject area, and give students valuable experience in preparing for the level of rigor required for industry certification exams they may face in the future.

IT Specialist Java
Students who enroll in KAP Computer Science II and Dual Credit Computer Science II have the opportunity to earn this certification.

Unity Certified User Programmer
Students who enroll in KAP Unity Game Development have the opportunity to earn this certification.

AWS Certified Cloud Practitioner Foundational
Students who enroll in KAP AWS Advanced Cloud Computing have the opportunity to earn this certification.

AVAILABLE AP EXAMS

Students have the opportunity to take the AP Exam within the Computer Science program. Many colleges and universities accept a score of three or higher to be used for credit in a computer science course.

AP Computer Science Principles
Students who enroll in AP Computer Science Principles have the opportunity to take this exam.

AP Computer Science A
Students who enroll in AP Computer Science Principles have the opportunity to take this exam.

Cisco CCNA implementing and Administering Cisco Solutions
Students who enroll in Cisco Network Engineering II at Miller Career and Technology Center have the opportunity to earn this certification.
