MEET AND GREET

This meeting is required to be recorded and posted to the SHAC website within 10 days.

KATY ISD PARTNERS IN EDUCATION

Cydney Wright spoke about the Katy ISD KEYS program. The KEYS program is put on to help those students across the district that struggle with Social/Emotional support. The program supports 600-700 students consisting of a 1 mentor with 1 student for 1 hour per week process. The mentee is referred, the student must agree, and the parent does approve of the interaction. The program is so impactful that most of the mentors stay in touch with their student throughout their life.

HARRIS COUNTY PUBLIC HEALTH

Kara Ihedigbo discussed the Community Health and Wellness includes opportunities for the whole family. Most of their services that are offered address the health TEKS. All their programs are offered in person and can be taught at a school or in a community setting.

FT. BEND HEALTH AND HUMAN SERVICES

Dr. Jackie Mintor and Kaila Williams discuss what Ft. Bend County offers for Community Health Improvement Plan by way of the 2022 Community Health Assessment. They established a multi sector committee that was made up of K-12 education, higher learning, and surrounding community. Their top 5 health priorities are mental health, housing, obesity, heart disease, and maternal health/prenatal care. Their next steps toward achieving these goals are to adopt and engage in the CHIP goals. They will give an update November 14 on where they are in achieving these goals.
