

General Project Information

Server Lifecycle and Growth

Project: Technology Infrastructure

Project Description: Replacement of network access switches, upgrade of wireless access points and controllers, network security infrastructure, and server lifecycle and growth

Project Priority: 1

Background & Justification: The District has a (5) year replacement cycle on all server equipment that is no longer covered under HP warranty/support, as well as equipment that is no longer supporting the workload demands. This current cycle will address email gateway servers, web load balancers, network time servers, replacement servers for blade centers, database servers, storage
